

2016 Road Improvement Program August 19th Update

As of August 19th, work in the following areas has been completed or is well underway.

- South side of Hornberger Avenue sidewalk and curbs from Delaware to Parish. COMPLETED
- North side of Hornberger Avenue Curbs, Ramps, and sidewalks have begun on August 19th. Due to an Executive Order signed by Governor Christie, grant funding that was set aside for paving projects statewide (including the Hornberger Avenue project) has been frozen and all non-essential work must cease. However, the township is completing the ramps and sidewalks portion of the work so the school children have a safe route to walk when the new school year begins. For now, the milling and paving of Hornberger Avenue is on hold until the state legislature resolve funding issues with the Transportation Trust Fund.
- 10th Avenue COMPLETED
- 9th Avenue COMPLETED
- Main Street COMPLETED
- Kinsman Road COMPLETED
- Pelle Court COMPLETED
- E. 8th Street COMPLETED
- Riverview Drive COMPLETED
- Riverbank Drive COMPLETED
- Foundry Street COMPLETED
- West Second Street COMPLETED
- West Third Street COMPLETED
- Chestnut Street curbs and sidewalks completed, milling has begun, paving set for week of 8/22
- Walnut Street curbs and sidewalks completed, milling has begun, paving set for week of 8/22

The next phase of work will include the following streets. The schedule is subject to change.

- Olive Street from Cedar Lane to Abrams Drive
- Broad Street from Ninth Street to Alterra Drive in Florence Meadows
- West Fifth Street – North Side just off Broad Street
- Portions of Cedar Lane Extension between Old York and Burl-Col Road.

Due to weather conditions and other delays that may be beyond the control of the township and the contractor, there is the possibility that the schedule will have to change. Notices will be posted on the website and Facebook. The contractor will also drop information flyers to property owners in advance of work.

There will also be a Road Improvement Program in 2017. The township is currently evaluating roads so work can be included in the 2017 Road Program.
