Construction of upgrades and improvements to the Township of Florence Water Treatment Plant, West Sixth and Summer Streets, Florence NJ, in the amount of $13,592,000.00 in capital improvement project costs that were financed by the New Jersey Water Bank (NJWB).

The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

The project will provide water quality benefits by removing PFAS/PFOS from the public water supply for residents and businesses in the water service area of the Township of Florence.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
