1. EXECUTIVE SUMMARY

On November 24, 2021, Liberty Environmental, Inc. (Liberty) was authorized by Firsttrust Bank to perform a Phase I Environmental Site Assessment (ESA) at the Cathy Lane, LLC property located at 61 Cathy Lane in Florence Township, Burlington County, New Jersey. The subject property consists of a single 7.19 acre parcel with three structures and parking areas located in a mixed use commercial/residential area. The Phase I ESA was performed in accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard Practices E1527-21, and in accordance with Liberty's Proposal P210758, dated November 22, 2021. The Phase I ESA was performed in accordance with the scope and limitations of ASTM Standard Practice E1527-21. The Phase I ESA was also conducted in accordance with the previous version of the Phase I ESA ASTM Standard (E1527-13), which is consistent with the definition of All Appropriate Inquiry as defined in 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry – Final Rule, November 2005). Any exceptions to, or deletions from, this practice are described in Sections 2.2 and 2.3 of this report.

The following historical recognized environmental condition (HREC), as defined in Section 3.2.42 of ASTM Standard Practice E1527-21, has been identified at the subject property, indicating a past release in connection with the subject property, which has been fully addressed to the satisfaction of regulatory agency requirements to have met unrestricted use criteria:

- A review of NJDEP files included a Tank Closure Report for one 10,000-gallon UST and one 2,000-gallon unleaded gasoline UST that were each installed at the subject property in 1982 and removed in 2006. During the removal of the 2,000-gallon tank, soil staining and odors were noted. Impacted soil was removed and disposed off site. Assessment samples were collected from the base and sidewalls of the excavation. No detectable concentrations of applicable New Jersey tank closure parameters were identified in any soil samples. On November 20, 2006, the NJDEP approved the closure activities within a written 'no further action' and covenant-not-to-sue letter for the removed USTs. Based on this information, the former USTs are identified as an HREC, for which no further evaluation is warranted at this time.

While not identified as a REC, the following business environmental risk (BER) has been identified as defined in Section 3.2.11 of ASTM Standard Practice E1527-21, and poses a potential environmental management responsibility associated with the current or future use of the site:

- Based on the age of the buildings, some painted surfaces may contain lead-based paint and the presence of potential asbestos-containing materials (ACM) in various forms such as roofing material cannot be ruled out. Prior to any planned renovation or demolition of the building, an ACM survey should be performed by a licensed inspector. If the building is planned for future use as a residential building or for child occupancy of any kind, a lead-based paint survey should also be performed. All identified ACM or lead-based paint should be properly abated or managed in accordance with applicable state and federal regulatory requirements.

The following *de minimis* condition, as defined in Section 3.2.22 of ASTM Standard Practice E1527-13, has been identified at the subject property. This does not present a threat to human health or the environment, generally would not be the subject of an enforcement action, and does not represent an REC:

- Small areas of staining was observed on the concrete floor in the southern portion of the garage building. The staining was limited in extent, did not extend to the edge of the concrete or to seams or cracks, and is representative of a *de minimis* condition.

With the exception of the issues described above, no other BERs, historical recognized environmental conditions (HRECs) or *de minimis* conditions have been identified on the subject property at this time. Based on the interviews, records research and site inspection activities conducted by Liberty as part of this Phase I ESA, no recognized environmental conditions (RECs), or controlled recognized environmental conditions (CRECs) as defined in ASTM Standard Practice E1527-21, have been identified on the subject property at this time.

2. INTRODUCTION

2.1 Purpose

The primary purpose of this study was to document the performance of all appropriate inquiries by the environmental professional for the subject property. Specifically, this document is intended to provide the “all appropriate inquiries” as referenced in CERCLA Section 101(35)(B), and as defined in 40 CFR Part 312 (*Standards and Practices for All Appropriate Inquiry - Final Rule, November 2005*). Such is applicable to persons seeking to qualify for (i) the innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3); (ii) the bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r); and (iii) the contiguous property owner liability protection pursuant to CERCLA Section 107(q). This report was not intended as part of the site characterization and assessment with use of a grant awarded under CERCLA Section 104(k)(2)(B). More specifically, the scope, as described in Section 2.2 below, is intended to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs) or business environmental risks (BERs).

An REC is defined in Section 3.2.73 of ASTM Standard Practice E1527-21 as (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment.

A CREC is defined in Section 3.2.17 of ASTM Standard Practice E1527-21 as an REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (e.g., activity and use limitations or other property use limitations).

An HREC is defined in Section 3.2.39 of ASTM Standard Practice E1527-21 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the subject property to any controls (e.g., activity and use limitations or other property use limitations).

A BER is defined in Section 3.2.11 of ASTM Standard Practice E1527-21 as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in the ASTM E1527-21 standard practice.

A *de minimis* condition is defined in Section 3.2.20 of ASTM Standard Practice E1527-21 as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs nor CRECs.

2.2 Scope of Work

This investigation was performed in accordance with ASTM Standard Practice E1527-21: *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and in accordance with Liberty's Proposal P210758, dated November 22, 2021. The Phase I ESA was also conducted in accordance with the previous version of the Phase I ESA ASTM Standard (E1527-13), which is consistent with the definition of All Appropriate Inquiry as defined in 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry – Final Rule, November 2005). Specifically, the scope of work for this Phase I ESA consisted of the following:

- A review of Federal and State environmental databases, made available through Environmental Data Resources, LLC (EDR). These databases and search radii were in accordance with those specified under ASTM Standard Practice E1527-13 Section 8.2.1, and include federal NPL, CERCLA, RCRA, ERNS, and brownfields/engineering control databases. State UST/AST/leaking tank databases, state equivalent NPL, CERCLA, solid waste, storage tank, brownfields, voluntary cleanup and engineering control databases were also included as part of this review.
- A review of physical setting sources, including USGS 7.5-minute topographic maps or equivalent, USGS or state agency bedrock/surficial geologic and hydrogeologic maps, and NRCS or other soil series maps, and other physical setting sources, as available.
- A review of historical property use and development information for the site and surrounding properties, through reasonably ascertainable sources dating to 1940 or the first developed use. These include one or more of the following: historical fire insurance maps or other historical map sources, aerial photographs, and tax assessment/recorded land title records, street or city directories, municipal zoning, code, building or fire department records, prior assessment reports, or other appropriate sources as warranted to ascertain land use to the dates described above.
- A review of available public records for activity and use limitations (AULs) or liens associated with environmental issues or activities at the subject property through a subcontracted lien search service provided by EDR, or other publicly available resources.
- A detailed site reconnaissance, with the objective of identifying past and present uses, features and condition of the subject property and adjoining properties, as they pertain to the identification of RECs. The site visit was limited to interior and exterior areas which could be physically and/or visually observed from within the boundaries of the subject property.
- Interviews with persons knowledgeable of the history of the site and surrounding area, including past and/or present site owners, occupants or key site managers, with first-hand knowledge of the subject site. For the subject property, this individual was Mr. Toby Chrostowski, the owner of the subject property under the entity name Cathy Lane LLC. Mr. Chrostowski is also the owner of Jottan Roofing, the primary tenant within the subject site.
- File reviews (or interviews, where feasible) coordinated through local government agencies pertaining to the history of the site and surrounding area, including environmental programs, municipal code enforcement, zoning, fire departments, or other appropriate local sources.

On November 30, 2021, Liberty submitted an Open Public Records Act (OPRA) request to Florence Township. On December 1, 2021, Liberty submitted an OPRA request to Burlington County.

- Liberty reviewed environmental database records for evidence of listings associated with the subject property or properties immediately adjacent to the subject site, which would reflect conditions that would indicate the likelihood of New Jersey Department of Environmental Protection (NJDEP) program records for the properties. Following a review of the subject property and adjacent properties through the EDR Radius Map Report, Liberty submitted a file review request for the subject property. Liberty reviewed records at the NJDEP Office in Trenton, NJ on December 14, 2021. The NJDEP file review is further discussed in [Section 5.4](#).
- A review of the United States Environmental Protection Agency (EPA) Envirofacts on-line database.
- Completion of the User Questionnaire by the client, conforming to the format presented as Appendix X3 of ASTM Standard Practice E1527-13, which describes any user-provided information concerning known environmental issues affecting the subject property, its planned use, and the conditions of its purchase, as applicable.

This Phase I Environmental Site Assessment report was prepared for, and may be relied upon, by Firsttrust Bank, its counsel and consultants. No other person or organization is entitled to rely on this report without the written authorization of Liberty.

This Phase I ESA was performed by Mindy Wagaman under the supervision of Matthew J. Adukaitis, both environmental professionals meeting the qualifications specified in the EPA's All Appropriate Inquiry Final Rule (40 CFR Part 312), Subpart B (312.10).

2.3 Data Gaps

No data gaps or other deletions from the standard scope of work of ASTM Standard Practice E1527-21 were encountered during the completion of this report.

3. SITE SETTING

3.1 Property Description

Property Summary	
Property Size:	7.19 acres
Primary Land Usage:	Commercial (Zoned Special Manufacturing)
Current Site Use:	Vacant (occupied by Jottan until November 2021)
Number of Buildings:	Three
Tax Parcel ID:	15-00163-01-00003-01 (Block 163.01, Lot 3.01)
Nearest intersection:	Cathy Lane and Route 130

Building Summary	
Building Name:	Offices
Number of Floors:	One
Total Square Feet of Space (approximate):	3,975
Construction Completion Date (year):	late 1960s/early 1970s
Cooling Type:	Electric forced air
Heating Type:	Natural gas heated forced air and electric heat pumps
Current Use:	Vacant
Utilities	
Water:	Florence Township
Wastewater/Sewer:	Florence Township
Natural Gas:	PSE&G
Electrical:	PSE&G

Building Summary	
Building Name:	Barn
Number of Floors:	One
Total Square Feet of Space (approximate):	2,381

Building Summary	
Construction Completion Date (year):	late 1950s/early 1960s
Cooling Type:	Electric unit for office space
Heating Type:	Natural gas fueled furnace
Current Use:	Vacant
Utilities	
Water:	Florence Township
Wastewater/Sewer:	Florence Township
Natural Gas:	PSE&G
Electrical:	PSE&G

Building Summary	
Building Name:	Garage
Number of Floors:	One
Total Square Feet of Space (approximate):	13,465
Construction Completion Date (year):	late 1970s
Cooling Type:	None
Heating Type:	Natural gas fueled ceiling mounted heaters
Current Use:	Vacant
Utilities	
Water:	Florence Township
Wastewater/Sewer:	Florence Township
Natural Gas:	PSE&G
Electrical:	PSE&G

3.2 Physical Setting

Physical Setting	
Topography:	The site slopes south, with an elevation of approximately 43 to 58 feet above mean sea level. Regionally, the topography grades generally east toward Bustleton Creek, located approximately 0.3 mile west of the subject property.
Geology:	The subject property is underlain by the Magothy Formation.
Surficial Soils:	The subject property is mapped as Adelphia fine sandy loam, 0 to 5 percent slopes; Shrewsbury fine sandy loam, 0 to 2 percent slopes; and Galestone sand, 0 to 5 percent slopes,
Estimated Groundwater Flow Direction:	West
Estimated Depth to Groundwater:	30 to 40 feet
Wetlands:	According to the U.S. Fish & Wildlife Service's National Wetlands Inventory (NWI) Digital Map data for the subject property, a freshwater forested/shrub wetland is mapped on the southwestern portion of the subject property. Please note that this identification of mapped wetlands areas is not intended to supplement or interpret or replace a field evaluation of wetlands areas by a qualified professional.

3.3 Site Reconnaissance

On December 14, 2021, Liberty's representative (Mindy Wagaman) conducted a visual inspection of the subject property. The purpose of the inspection was to visually determine the presence of adverse environmental conditions on or near the subject property. A Jottan Roofing employee was present at the time of the site inspection and provided access to all portions of the subject property for inspection. The weather at the time of site inspection was sunny and 50F. A Site Location Map and Site Plan are included as [Appendix A](#). Site photographs from the December 14, 2021 site visit are provided as [Appendix B](#).

The three buildings on the subject property are of slab-on-grade construction with public water and sanitary sewer connections. The buildings are heated with natural gas fueled heating units and electric air conditioner units are used to cool the office spaces of the barn and office building. The subject property is currently vacant and all buildings were unoccupied during the site inspection.

The office structure contains offices, a kitchen area, meeting room, and bathrooms. The building has an attic that contains the natural gas furnace and HVAC ductwork.

The barn structure contains an office, a reception area, two utility closets and the remaining portion is used for storage. Four pallets of roofing adhesive are being stored in the garage area along the south side of the building. The other storage areas contained empty wooden shelves. The building has an attic that has a garage door to the outside and contains empty wooden shelves.

The rear (south) portion of the garage structure had been used by RMR Services and Repair and consisted of office space, a bathroom, a storage area, and a large garage space. A rectangular floor drain was noted in the garage area. No stains were noted around the drain. According to a prior Phase I, as further described in Section 4.2, this drain had been connected to the sanitary sewer system prior to being sealed. The northern portion of the garage is used by Jottan, Inc. for the storage of new roofing materials. Water damage was observed in this area, which also contains an office space, a bathroom and a mechanical room.

The exterior portions of the subject property include grass covered areas, wooded areas to the north and west, and asphalt and gravel parking areas near the buildings. A total of four pole-mounted transformers were observed on the subject property, and one pole mounted transformer was observed along Cathy Lane. No external markings regarding PCB content were observed on the transformers. The transformers appeared in fair and good condition and no staining was observed.

Our observations of the adjoining and adjacent properties did not reveal evidence of potential environmental concerns such as suspect storage facilities, visible fueling facilities or significantly stained surfaces.

A standard checklist was completed during the visit and is included below.

Issue	Observed	Comments
Hazardous Substances and Petroleum Products	No	
Underground Storage Tanks	No	
Aboveground Storage Tanks	No	
Odors	No	

Issue	Observed	Comments
Pools of Liquid	No	
Drums	No	
Unidentified Substances Containers	No	
On-Site Chemicals	Yes	New containers of roofing adhesive are stored in the barn and the north portion of the garage building.
Hydraulic Oil	No	
PCBs	No	
Pits, Ponds, or Lagoons	No	
Stained Soil or Pavement	No	
Stains or Corrosion	No	
Stressed Vegetation	No	
Solid Waste	No	
Transformers	Yes	A total of four pole-mounted transformers were observed on the subject property, and one pole mounted transformer was observed along Cathy Lane. No external markings regarding PCB content were observed on the transformers. The transformers appeared in fair and good condition and no staining was observed.
Wastewater	No	
Wells	No	
Septic Systems	No	
Heating/Cooling	Yes	Natural gas fueled heating units are used in each of the building. Electric air conditioner units are used to cool the office spaces of the barn and office building.
Drains and Sumps	Yes	A rectangular floor drain was noted in the south garage, formerly occupied by RMR Service.
Surrounding Area Environmental Issues	No	
Surface Water	No	

3.4 Site Background/Operating History

According to site contact interviews, deed records, historical maps, and historical aerial photographs, the subject property was used as agricultural farmland prior to 1930. Between 1953 and 1962, the current barn building was constructed on the subject property. Around 1970 the office building was constructed on the subject property, and by 1984 all three structures were constructed. In 1982, two USTs were installed on the subject property, which was owned by Ventures SME. Between 1972 and 2006 the subject property was used by Paris Minuto Inc, a contractor, and portions of the property were also operated by various tenant operations (Florence Equipment, Tim Cross, Road Runner), which consisted of equipment or automotive repair operations. In 2006, the subject property was purchased by PRM Associates, and in 2008 the property was transferred to Cathy Lane LLC, the current owner of the site.

3.5 Surrounding Land Use

The following table summarizes the use of the properties surrounding the subject site.

Direction from Site	Current Use
North	Residential Properties and Hotel (Stangler Motel)
East	(Across Cathy Lane) Commercial Properties (Vacant - formerly Helping Hands - and Todd Tool & Machine, Inc.) with a Residential Development beyond
South	Parking Lot, Cell Tower, and Woods
West	(Across New Jersey Turnpike entrance/exit ramp) NJ Turnpike Maintenance Facility

4. USER PROVIDED INFORMATION

4.1 User Questionnaire

Pursuant to Section 6 of ASTM Standard Practice E1527-21, Liberty provided a User Questionnaire to the client for completion. The information provided on the Questionnaire conforms to the format presented as Appendix X3 of E1527-21 and includes information pertaining to known cleanup liens, activity and land use (AUL) restrictions, purchase price comparison to fair market value, and other relevant information known to the User. The table below summarizes the information provided by the user. The completed questionnaire is provided as [Appendix C](#).

Question	Response
1. Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	As of the date of this form, no search has been ordered.
2. Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. As the use of this ESA do you have any specialized knowledge or experience related to the property or nearby properties?	No
4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes, to the best of my knowledge. A commercial appraisal has been ordered to confirm.
5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	
a) Do you know the past uses of the property?	No
b) Do you know of specific chemicals that are present or once were present at the property?	No
c) Do you know of spills or other chemical releases that have taken place at the property?	No
d) Do you know of any environmental cleanups that have taken place at the property?	No

Question	Response
6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	No

Based on the responses provided by Mr. Darren Federico, FirstTrust Bank SVP, Business Development Officer/SBA Lending Group, in the User Questionnaire, no potential environmental issues have been identified related to the questions posed. Please also note that in addition to the lien information request noted in the User Questionnaire, Liberty performed a review of available deed records for liens and deed restrictions for the subject property as part of its records review, as described in [Section 5.1.5](#).

4.2 User-Provided Documents

Liberty obtained a copy of the following prior environmental report from Mr. Hemel Patel of Finomus Capital Group and broker for the buyer:

Phase I ESA for 61 Cathy Lane Block 163.01, Lots 3.01 and 3.04, Prepared for JOTTAN Inc. by Marathon Engineering & Environmental Services, Inc. (Marathon), September 21, 2006.

Sections 1, 2 and 7 of the 2006 Marathon Phase I ESA were provided to Liberty. These sections of the larger report summarize the purpose of the report, the records reviewed, a description of the subject property and the findings and conclusions of the ESA. The subject property of the 2006 Phase I included the subject property of this Phase I (Block 163.01, Lots 3.01) and the adjacent Lot 3.04. The Marathon report provides descriptions of the site's layout and features which are generally consistent with those noted during Liberty's December 14, 2021 site walkover.

At the time of the 2006 Phase I, the subject property was operated by an HVAC contractor (Paris Minuito), Road Runner truck inspection and service, K. Pesk auto repair, a clothing distributor, Stokely Fire Safely Equipment, furniture delivery, and a lawn service company. The Phase I notes that the subject property had a septic system for domestic sewage until the mid-1970s when it was connected to the sanitary sewage system, and that a water supply well had been located near the office building prior to the subject property being connected to the public water supply. According to the Marathon Phase I, this well has been abandoned. During the 2006 site reconnaissance, six ASTs were observed on the subject property. The ASTs were located on the concrete floors within the Garage and Barn buildings. Some staining was observed on the concrete in the area of the ASTs but did not appear to extend past the concrete slab. Marathon noted that a trench drain was observed in the Road Runner garage and was reported to have discharged to the sanitary sewer system, but has been sealed for many years.

The findings of the Phase I noted that no RECs or areas of concern (AOCs) were identified, with the exception of possible groundwater contamination noted during the March 2006 UST closure activities.

A copy of the prior environmental report is included as [Appendix D](#).

5. RECORDS REVIEW

5.1 Historical Resources Reviewed

Historical Resource	Years Reviewed
Aerial Photographs	1931, 1938, 1940, 1944, 1951, 1953, 1962, 1969, 1970, 1974, 1984, 1989, 1992, 1995, 2002, 2004, 2006, 2010, 2013, 2017, 2021
Sanborn Fire Insurance Maps	No Coverage
Topographic Maps	1890, 1893, 1904, 1906, 1907, 1942, 1947, 1955, 1970, 1981, 2013, 2016, 2019
City Directories	2005, 2010, 2014, 2017
Deeds	2008

5.1.1 Historical Aerial Photograph Review

Liberty conducted a review of historical aerial photographs to investigate the development and land use history of the site. Aerial photographs from 1931 through 2017 were reviewed through an Aerial Photo Decade Package provided by EDR. In addition to these photographs, aerial photographs from 2002, 2004 and 2021 were obtained under licensed use through the Google Earth Pro database. A summary of the historical photograph review is presented in the table below. A copy of the EDR Aerial Photo Decade Package is provided in [Appendix E](#).

Historical Photo Review	
Year	Observations
1931	The subject property and surrounding area appears to be used as agricultural cropland. Route 130 can be seen along the north of the subject property. Residential structures are visible to the north of the subject property, along Route 130.
1938, 1940 and 1944	The only significant change is that the racetrack to the southeast of the subject property can be seen.
1951 and 1953	The subject property remains used as farmland. The motel and additional structures can be seen to the north of the subject property, and several rectangular structures are visible to the west of the subject property.

Historical Photo Review	
Year	Observations
1962, 1969 and 1970	The north portion of Cathy Road can be seen. A structure, in similar size and location of the current day barn, can be seen on the subject property. Additional structures appear to have been constructed to the northwest and northeast of the subject property.
1974	A building similar in shape and location to the east portion of the current day office is visible on the subject property. The southcentral portion of the subject property appears to be used for storage. The surrounding area appears to be used for farmland, residential and commercial business.
1984 and 1989	A large structure, in similar shape and location as the current day garage, can be seen on the southern portion of the subject property. Cathy Lane appears to have been extended to the current day configuration. A large commercial structure can be seen across Cathy Lane to the east of the subject property.
1992	The only significant change from the prior photograph is the racetrack can no longer be seen and a residential development appears to be being constructed to the east of the subject property.
1995	The only significant change from the prior photograph is what appears to be the use of the southeast adjacent property, across Cathy Lane from the subject property, as trailer parking.
2002, 2004 and 2006	The NJ Turnpike Interchange can be seen to the west of the subject property. A newly constructed commercial building is visible to the east of the subject property. The construction of a cell tower and fenced area is visible in the wooded area to the south of the subject property.
2010	The only significant change from the prior photograph is the addition of a rectangular expansion along the west of the office building.
2013, 2017 and 2021	The subject property and surrounding area appear similar to current day.

5.1.2 Historical Fire Insurance Map Review

Liberty performed a search for historical maps of the site, including Sanborn Fire Insurance maps covering the subject site through EDR. No Sanborn map coverage was available for the subject property.

5.1.3 Historical USGS Topographic Map Review

Liberty performed a search for historical maps of the site, including USGS topographic map quadrangles covering the subject site through EDR. Liberty obtained copies of USGS topographic quadrangle maps for several years between 1890 and 2019. Copies of the topographic maps are provided as [Appendix F](#). A summary of the topographic map review is presented in the table below.

Historical USGS Topographic Map Review	
Year	Observations
1890, 1893, 1904, 1906, and 1907	The subject property and surrounding area appears undeveloped. Route 130 is present to the north of the subject property.
1942 and 1947	The subject property is undeveloped. Single square structures are depicted to the north and west of the subject property. An oval racetrack is depicted to the east of the subject property.
1955	The subject property is undeveloped. Rectangular structures are shown to the north and west of the subject property.
1970	Two square structures are depicted on the subject property. Cathy Lane extends from Route 130 to the subject property. Three square structures are depicted as newly constructed to the east and west of Cathy Lane, to the northeast of the subject property.
1981	The only change from the prior map is the presence of three square structures on the subject property.
2013, 2016 and 2019	The NJ Turnpike interchange can be seen to the west of the subject property. Only roads and topographic lines are shown. No structures are depicted.

5.1.4 City Directory Review

Liberty performed a review of prior operations of the component addresses of the site through a contracted City Directory Report, provided by EDR. The report provides tenant, owner or operation name listings for the referenced properties using directories associated with EDR Digital Archives. A copy of the EDR City Directory is included in [Appendix G](#).

The listings for the subject property are as follows:

61 Cathy Lane	
Year	Occupant Listing
2017	Jottan Inc.
2010 and 2014	No Listings
2005	EB Electric Inc, Jerome Jones, Paris Minuto LLC

65 Cathy Lane	
Year	Occupant Listing
2017	RMR Services & Repair, Roadrunner Mobile Repair
2014	Roadrunner Mobile Repair
2010	No Listing
2005	Philip Nutt

5.1.5 Environmental Data Resources, LLC (EDR) Deed and AUL Review

Liberty obtained an EDR Lien Search Report, which includes the current deed. According to EDR's Environmental Lien and AUL search, no environmental liens or AULs were found.

Liberty reviewed the most recent deed included in the EDR Lien Search Report for language pertaining to liens, limitations and restrictions associated with environmental issues only. Please note that this review did not constitute a formal title search and is limited to observable language on the traceable deed records only. According to the current deed, the property is owned by Cathy Lane LLC, (Toby Chrostowski), who acquired the property from PRM Associates on July 28, 2008. PRM Associates purchased the property on December 21, 2006. This review did not identify the presence of environmental liens or AULs associated with the subject property.

A copy of the EDR Lien Search Report, including the current deed, is provided as part of [Appendix H](#).

5.2 Environmental Database Reviews

5.2.1 EDR Database Review

Liberty retained EDR to conduct a search of federal and state environmental databases in the vicinity of the subject site. The search included the list of federal and state environmental regulatory databases and search distances specified in Section 8.2.2 of ASTM Standard Practice E1527-21. The following is a list of databases that were searched as part of this review:

Federal Databases

- National Priority List (NPL) Proposed, Final, Delisted and Lien Sites
- Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Sites, including “No Further Action Planned” (NFRAP) Sites and consent decree/ records of decision sites
- Resource Conservation and Recovery Information System (RCRIS) small and large quantity generators, treatment, storage and disposal facilities (TSDF) and corrective action sites (CORRACTS)
- Emergency Response Notification System (ERNS)
- US Environmental Protection Agency (EPA) Engineering Controls Sites List
- US Environmental Protection Agency (EPA) Institutional Controls Sites List
- US Environmental Protection Agency (EPA) Brownfields Sites
- Toxic Chemical Release Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- Mines, PCB Activity, Materials Licensing Tracking, and general Facility Index System (FINDS) sites

State Databases

- Hazardous Sites Cleanup Act (HSCA) Sites
- Solids Waste/Landfill Sites, including historical landfill sites
- Regulated and Leaking Underground Storage Tanks (UST/LUST)
- Regulated and Leaking Aboveground Storage Tanks (AST/LAST)
- Archived UST/LUST and AST/LAST Sites
- Unregulated Leaking Tank sites
- Dry-cleaning facilities
- Voluntary cleanup program (VCP) sites, including engineering control and institutional control sites
- State Brownfields sites list
- Tribal Reservations

- Coal Gasification Sites

A copy of the EDR environmental database report is included in [Appendix I](#). Detailed descriptions of each of the searched databases listed above and the results of the federal and state database searches are provided in the EDR report. A summary of database listings for the subject property and adjacent properties are provided below.

The subject property (Florence Industrial Center, Florence Industrial Park and 61 Cathy Lane) was identified in the state and federal databases as a UST site, a NJ release site, a Known Contaminated Site in NJ (SWHS), a NJ Environmental Management System (EMS) site, and a Facility Index Systems (FINDS) site. The UST listing notes that a 2,000-gallon and a 10,000-gallon unleaded gasoline USTs were installed at the subject property in February 1982 and removed in March and April 2006. The SHWS listing only notes a status of "closed" for the Florence Industrial Center. The EMS and FINDS identify the Florence Industrial Park with not further information.

Numerous other non-adjacent sites were identified on the EDR database. Based on a review of these sites, which included an evaluation of distance, relative elevation, regulatory status or other relevant factors, Liberty has determined that these facilities are not believed to pose an environmental concern.

Based on this information, Liberty submitted a DEP file review request for the subject property (Florence Industrial Center/ Park), and the Universal Chemicals & Metals Corp facility. The NJDEP file review is further discussed in [Section 5.4](#).

5.2.1.1 Orphan Site Summary

Orphan sites are properties which, based on limited site information, cannot be accurately depicted geographically. Twenty-nine orphan sites were identified in the database report.

Based on a search of available address and location information for each orphan site, none of the orphan facilities were found to be present within a default distance of 0.5 mile from the site, and no sites are believed to pose environmental concerns to the subject property.

5.3 Municipal File Review Requests/Records Review

OPRA Request – Florence Township

On November 30, 2021, Liberty submitted an OPRA request to Florence Township. The submittal requested information pertinent to the environmental conditions of the site, including (but not limited to) emergency response or spill incidents, current or former tank systems, wastes, or other issues of potential concern. On December 3, 2021, Liberty received a response from Florence Township with copies of two 2006 UST removal permit applications. The permits were for the removal of a 2,000-gallon and 10,000-gallon gasoline USTs. On December 14, 2021, Liberty visited the Township office to review a 2007 site plan. Copies of these files are included in [Appendix J](#).

OPRA Request – Burlington County

On December 1, 2021, Liberty submitted an OPRA request to Burlington County. The submittal requested information pertinent to the environmental conditions of the site, including (but not limited to) emergency response or spill incidents, current or former tank systems, wastes, or other issues of potential concern. On December 1, 2021, Liberty received a response from Ashley Godfrey, Deputy Custodian of Public Records stating no files were found for the subject property.

5.4 NJDEP Records Review

As discussed in Section 5.2.1, Liberty submitted a NJ DEP file review request for the subject property. Liberty performed the records review at the NJ DEP Office in Trenton, NJ on December 14, 2021, additionally files were emailed to Liberty for review. Liberty also performed a search of the NJDEP's NJ-GeoWeb and DataMiner on-line databases.

Subject Property (61 Cathy Lane/Jottan Roofing)

NJ DEP files included an Industrial Site Recovery Act (ISRA) applicability/nonapplicability affidavit dated September 12, 2006 for the sale of the subject property from Ventures S.M.E. to Jottan Roofing's owner, Toby Chrostowski. The affidavit listed the use of the subject property from 1983 until 2006. This use of the subject property included contractors, auto repair, sales, clothing distributor, dairy and property maintenance. A letter from the NJ DEP dated September 21, 2006, stated the subject property is not subject to the provisions of the Industrial Site Recovery Act (ISRA).

A October 23, 2018 complaint was filed with the DEP noting the subject property was leaving open drums outside and when it rains the drums overflow and the warehouse floods, washing materials outside. The complaint was investigated and it was reported that no signs of discharge were observed. The incident status is noted as "terminated".

Subject Property (Roadrunner Mobile Repair)

NJ DEP emailed a copy of the Community Right to Know Survey report for the Roadrunner Mobile repair facility. The survey noted that in 2003 and 2004 hazardous substances were stored, produced or used at the site, but below applicable thresholds.

Subject Property (Florence Industrial Center)

The NJ DEP file contained storage tank information for the subject property, including the registration of a 2,000-gallon and a 10,000-gallon unleaded gasoline USTs were installed at the subject property in February 1982. A tank closure report in the file documents the removal of these USTs in March and April 2006. According to the closure report, no impacts were observed during the removal of the 10,000-gallon UST, but soil staining or odors were noted on top of the 2,000-gallon UST. This material was stockpiled and disposed. Samples collected following the removal of the USTs did not have detected concentrations of NJ site remediation compounds. On October 16, 2006, the NJ DEP issued a No Further Action and Covenant-Not-To-Sue letter for the removed USTs.

Copies of the pertinent information reviewed is provided as [Appendix K](#).

5.5 EPA File Review

In addition to reviewing available state records for the subject property, Liberty performed a search of the Environmental Protection Agency (EPA) on-line database through the Envirofacts database portal. No records regarding the subject property were provided within the EPA's Envirofacts database.

5.6 Data Failure

Based on the definition presented in ASTM E1527-21, data failure occurs when all of the standard historical sources that are reasonably-ascertainable and likely to be useful have been reviewed and the historical use of the Property has not been documented back to the Property's first developed use, or 1940 whichever is earlier. When data failure occurs, ASTM E1527-21 requires the Environmental Professional to document the data failure and assess the potential impact on the ability of the Environmental Professional to identify recognized environmental conditions.

Liberty was able to document the historical use of the subject property in accordance with the Standard and therefore no related data failure was identified.

6. INTERVIEWS

Mr. Tony Tete, Yard Worker and Representative of Cathy Lane LLC

On December 16, 2021, Mr. Tony Tete, a yard worker for JOTTAN and representative of Cathy Lane LLC, the owner of the subject property, completed a series of questions relating to the subject property in lieu of a direct interview. According to the questionnaire Mr. Tete has been associated with the subject property since December 2006. Mr. Tete noted that the subject property was most recently used by a commercial roofing company for storage and office space. According to Mr. Tete, there are not currently, or have their been, USTs, ASTs, wells or septic systems on the subject property. Mr. Tete stated that he is unaware of any discharges of fluids on the subject or adjacent properties, and has no knowledge of any dumping, buried waste/containers or imported fill material at the subject property. Mr. Tete also noted that he has no knowledge of environmental issues with the subject or surrounding properties.

7. VAPOR MIGRATION

An evaluation of potential vapor migration risks at the subject property has been performed as part of this Phase I ESA. The evaluation is based on available data and does not include a vapor screening as outlined in ASTM Standard Guide E2600-15: *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. Based on the interviews, records research, and site inspection activities conducted by Liberty as part of this Phase I ESA, no potential vapor migration risks were identified at the subject property at this time.

8. FINDINGS AND OPINIONS

Liberty Environmental, Inc. has completed a Phase I ESA at the Cathy Lane, LLC property located at 61 Cathy Lane in Florence Township, Burlington County, New Jersey. The Phase I ESA was performed in accordance with the scope and limitations of ASTM Standard Practice E1527-21. The Phase I ESA was also conducted in accordance with the previous version of the Phase I ESA ASTM Standard (E1527-13), which is consistent with the definition of All Appropriate Inquiry as defined in 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry – Final Rule, November 2005). Any exceptions to, or deletions from, this practice are described in Sections 2.2 and 2.3 of this report.

The following historical recognized environmental condition (HREC), as defined in Section 3.2.42 of ASTM Standard Practice E1527-21, has been identified at the subject property, indicating a past release in connection with the subject property, which has been fully addressed to the satisfaction of regulatory agency requirements to have met unrestricted use criteria:

- A review of NJDEP files included a Tank Closure Report for one 10,000-gallon UST and one 2,000-gallon unleaded gasoline UST that were each installed at the subject property in 1982 and removed in 2006. During the removal of the 2,000-gallon tank, soil staining and odors were noted. Impacted soil was removed and disposed off site. Assessment samples were collected from the base and sidewalls of the excavation. No detectable concentrations of applicable New Jersey tank closure parameters were identified in any soil samples. On November 20, 2006, the NJDEP approved the closure activities within a written 'no further action' and covenant-not-to-sue letter for the removed USTs. Based on this information, the former USTs are identified as an HREC, for which no further evaluation is warranted at this time.

While not identified as a REC, the following business environmental risk (BER) has been identified as defined in Section 3.2.11 of ASTM Standard Practice E1527-21, and poses a potential environmental management responsibility associated with the current or future use of the site:

- Based on the age of the buildings, some painted surfaces may contain lead-based paint and the presence of potential asbestos-containing materials (ACM) in various forms such as roofing material cannot be ruled out. Prior to any planned renovation or demolition of the building, an ACM survey should be performed by a licensed inspector. If the building is planned for future use as a residential building or for child occupancy of any kind, a lead-based paint survey should also be performed. All identified ACM or lead-based paint should be properly abated or managed in accordance with applicable state and federal regulatory requirements.

The following *de minimis* condition, as defined in Section 3.2.22 of ASTM Standard Practice E1527-13, has been identified at the subject property. This does not present a threat to human health or the environment, generally would not be the subject of an enforcement action, and does not represent an REC:

- Small areas of staining was observed on the concrete floor in the southern portion of the garage building. The staining was limited in extent, did not extend to the edge of the concrete or to seams or cracks, and is representative of a *de minimis* condition.

With the exception of the issues described above, no other BERs, historical recognized environmental conditions (HRECs) or *de minimis* conditions have been identified on the subject property at this time. Based on the interviews, records research and site inspection activities conducted by Liberty as part of this Phase I ESA, no recognized environmental conditions (RECs), or controlled recognized environmental conditions (CRECs) as defined in ASTM Standard Practice E1527-21, have been identified on the subject property at this time.

9. ENVIRONMENTAL PROFESSIONAL STATEMENT

This Phase I ESA was performed by Mindy D. Wagaman and supervised by David S. Coyne, QEP, both environmental professionals meeting the qualifications specified in the EPA's All Appropriate Inquiry Final Rule (40 CFR Part 312), Subpart B (312.10).

I declare that, to the best of my professional knowledge and belief, I meet the definition of the Environmental Professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

A handwritten signature in black ink, appearing to read "David S. Coyne", is written over a horizontal line.

10. LIMITATIONS

This Phase I Environmental Site Assessment has been conducted using applicable professional industry standards, including but not limited to, ASTM Standard Practice E1527-21: *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The assessment is limited to those areas that were readily accessible during the site reconnaissance, and those environmental conditions that can be detected by normal visual inspection. As set forth in Section 13.1 of ASTM Standard Practice E1527-21, this assessment does not address naturally-occurring conditions. Liberty has used information provided by interviewees to formulate its conclusions and recommendations, and assumes no responsibility or liability for inaccurate or incomplete data. Comments regarding the condition of the site do not represent a warranty that all areas within the site or surrounding areas are of the same condition as may be inferred from observable site conditions and readily available site background data. There is no guarantee, either expressed or implied, that the site and surrounding areas are free of hazardous substances or petroleum products.

Except as otherwise described herein, the observations noted in the Phase I ESA are not intended to represent or replace the following surveys, searches or inspections:

- Soil or groundwater sampling;
- An asbestos-containing materials (ACM) survey by a licensed asbestos inspector;
- Quantitative lead-based paint survey by a qualified inspector;
- A wetlands delineation or presence/absence survey by a qualified wetlands biologist;
- A full title search for insurance purposes;
- A hazardous building materials survey;
- Microbial matter or mold/mildew evaluation;
- Quantitative vapor intrusion evaluation; and
- Quantitative radon testing.

APPENDIX C: USER QUESTIONNAIRE

Liberty
Environmental, Inc.

**USER QUESTIONNAIRE
FOR**

PHASE I ENVIRONMENTAL SITE ASSESSMENTS COMPLIANT WITH ASTM STANDARD PRACTICE E1527-13 AND 40 CFR PART 312 (USEPA ALL APPROPRIATE INQUIRY STANDARDS AND PRACTICES)

Instructions: To be completed by the User (i.e. the client or client's representative) of the Phase I ESA. Please answer all questions.

1. Environmental liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? *As of the date of this form, no search has been ordered.*

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v)).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? *No*

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? *Yes, to the best of my knowledge. A commercial Appraisal has been ordered to confirm.*
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

- a) Do you know the past uses of the property? *No*
- b) Do you know of specific chemicals that are present or once were present at the property? *No*
- c) Do you know of spills or other chemical releases that have taken place at the property? *No*
- d) Do you know of any environmental cleanups that have taken place at the property? *No*

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property? *No*

1.0 INTRODUCTION

Marathon Engineering & Environmental Services, Inc., ("Marathon") was retained JOTTAN Inc. to conduct a Phase I Environmental Site Assessment ("Phase I") of the property situated at 61 Calby Lane in Florence Township, Burlington County, New Jersey. The property is designated on the Florence Township Tax Maps as Block 163.01, Lots 3.01 and 3.04, hereafter referred to as the Subject Property.

The Phase I was conducted in accordance with the American Society of Testing and Materials ("ASTM") Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-00) and the New Jersey Department of Environmental Protection's ("NJDEP") Technical Requirements for Site Remediation (N.J.A.C. 7:26E et seq.).

This report details information obtained by Marathon during the investigation completed through September 21, 2006. Pertinent information made available after September 21, 2006, which would change the conclusions of this report, will be forwarded upon receipt. The available data was used to identify recognized environmental conditions ("RECs") as defined by the ASTM and areas of concern ("AOCs") as defined by the NJDEP. The scope of the evaluation was performed in accordance with ASTM E 1527-00 and N.J.A.C. 7:26E et seq., and included the following:

1. We obtained and reviewed information, including a regulatory database report, which identifies facilities included on the databases referenced as standard environmental record sources by ASTM. The standard environmental record sources are listed below:
 - United States Environmental Protection Agency's ("USEPA") National Priority List ("NPL") (within 1.0 miles);
 - USEPA's Comprehensive Environmental Response, Compensation and Liability Information System ("CERCLIS") report (within 0.5 miles);
 - USEPA's CERCLIS No Further Remedial Action Planned ("NFRAP") report (within 0.25 miles);
 - USEPA's Resource Conservation and Recovery Act ("RCRA") Treatment, Storage and Disposal Facilities ("TSD") report (within 0.5 miles);
 - USEPA's RCRA Corrective Action Sites ("COR") report (within 1.0 miles);
 - USEPA's RCRA Generators ("GEN") report (within 0.25 miles);
 - USEPA's Emergency Response Notification System ("ERNS") report (Subject Property);
 - NJDEP's State Hazardous Waste Sites ("SHWS") report (within 1.0 miles);

- NJDEP's Solid Waste Facility Directory ("State Landfill") report (within 0.5 miles);
 - NJDEP's Leaking Underground Storage Tanks ("LUSTs") report (within 0.5 miles); and,
 - NJDEP's Regulated Underground Storage Tanks ("USTs") and Aboveground Storage Tanks ("ASTs") report (within 0.25 miles).
2. We obtained and reviewed the following additional environmental record sources, as defined by the ASTM, to the extent that they were available or provided to Marathon by September 21, 2006. These additional environmental record sources include:
- Additional state and federal environmental records (for the Subject Property);
 - Burlington County files; and,
 - Florence Township files.
3. We obtained and reviewed the United States Geological Survey ("USGS") Topographic Quadrangle for Bristol, Pennsylvania – New Jersey (physical setting source as defined by ASTM) as well as discretionary and non-standard physical setting sources, including the NJDEP's Geographical Information System ("GIS") for information pertaining to surficial geology, soils, freshwater wetlands and public water supply wells.
4. We reviewed historical use information to establish a history of the Subject Property and surrounding area. The historical use information reviewed by Marathon included:
- Previous studies;
 - Aerial Photographs; and,
 - Interviews.
5. On August 23, 2006, we performed a site reconnaissance to visually and physically observe the Subject Property noting uses and conditions, determining general property setting, listing uses of adjoining properties, determining hydrogeologic and topographic setting, noting roads and utilities, and checking for the following to the extent that they were visually or physically observable:
- presence of hazardous substances and petroleum products;
 - storage tanks, drums and containers;
 - polychlorinated biphenyls ("PCBs");
 - stains and corrosion;
 - drains and sumps;
 - stressed vegetation, stained soils or pavement;
 - railroads;

- solid waste, waste water; and,
 - wells and septic systems.
6. The following non-scope considerations were not included in this Phase I as they are not required under ASTM E 1527-00:
- radon;
 - wetlands;
 - pesticides;
 - asbestos; and,
 - lead-based paint.
1. We prepared this report of findings including documentation to support analysis, opinion and conclusions. The report identified no RECs as defined by ASTM E 1527-00 or AOCs as defined in N.J.A.C. 7:26E et seq. associated with the Subject Property. This assessment has revealed no RECs and/or AOCs associated with the Subject Property with the exception of possible groundwater contamination resulting from the detected discharge of gasoline during the March 2006 UST closure activities. Marathon recommends that the seller comply with the requirements of the NJDEP's July 31, 2006 letter and that an NFA for the USTs AOC be obtained prior to accepting ownership of the Subject Property and that the required documents be submitted to Florence Township to close the open UST demolition permits.

1.1 Limitations and Exceptions

It should be noted that this Phase I documents conditions on the Subject Property at the time of the site reconnaissance conducted on August 23, 2006 and information relevant to the Subject Property reviewed through September 21, 2006. The information detailed herein, upon which the findings and conclusions are based, is limited under the following conditions:

1. Much of the information contained within this report regarding potential environmental concerns for the Subject Property and surrounding properties was obtained from publicly available databases and public files. Marathon is not responsible for errors potentially present in these databases and public records.
2. Marathon is not responsible for future regulatory modifications, agency interpretations, and/or policy changes that may affect the compliance status of the Subject Property

3. Marathon's site reconnaissance conducted on August 23, 2006 involved inspecting readily accessible areas. Marathon did not conduct subsurface investigations including inspection under solid waste or other physically obstructed areas that could not be reasonably inspected without the use of heavy machinery or geophysical probing devices.
4. This report is intended for the exclusive use of JOTTAN Inc. The results of this study may not be relied upon by any other parties, other than those described above, without written consent of Marathon.

1.2 Statement of Qualifications

Marathon is an environmental consulting firm with extensive knowledge and expertise in conducting Phase Is. This Phase I was conducted and the subsequent report prepared by Carl J. Bonés, PE, CIE, CIAOP, CBI, RBI, Project Engineer, and reviewed by Robert L. Carter Jr., Geologist. Their professional resumes are included in Appendix A – Qualifications.

2.0 SITE DESCRIPTION

2.1 Site Location and Description

The Subject Property is located at 61 Cathy Lane in Florence Township, Burlington County, New Jersey. The Subject Property is designated on the Florence Township Tax Maps as Block 163.01, Lots 3.01 and 3.04, a copy of which is included in Appendix B. The Subject Property is located on the Bristol, Pennsylvania - New Jersey USGS 7.5-Minute Topographic Quadrangle, a copy of which is included in Appendix B. Also included in Appendix B is a copy of a 1995 aerial photograph that depicts the Subject Property.

The Subject Property is bordered to the north by U.S. Route 130 and Lots 3.02 and 15.02, to the east by Cathy Lane, to the west by the NJ Turnpike and by wooded lands to the south. There are three (3) buildings on the Subject Property. The Office Building, a one-story wood frame structure, is used for administrative functions. This building has an addition at the west (rear) elevation that integrates two (2) travel trailers with a structure in between that were adjunct offices at one time but are now unused. The other two (2) buildings are the "Green Building", a concrete and steel high-ceiling structure with drive in garage doors for tenants, and the "Barn", a one-story steel clad building in the shape of a small barn, used for storage.

2.2 Site Characteristics

The Subject Property encompasses 4.83± acres with 32± feet of frontage along U.S. Route 130 and 700± feet of frontage along Cathy Lane. The buildings on the Subject Property are accessed via multiple entrances along Cathy Lane. The Subject Property is used for a HVAC contractor business by the current owner, Parls R. Minuto. In addition, portions of the Green Building are leased to other business owners including: Roadrunner truck inspection and service shop; K. Pesk auto repair; S. Amash, clothing distributor; Stokely Fire Safety Equipment; BFB Enterprises, furniture delivery; and, Lawn Works, a lawn service company and other businesses that store dry-goods. In addition, there is a small parcel of land that has a Verizon Wireless cell tower that is surrounded by but not part of the Subject Property (see aerial photograph in Appendix B).

7.0 FINDINGS AND CONCLUSIONS

Based on historical site use, government agency records review, site reconnaissance, adjacent property usage, and site investigation, Marathon's findings are as follows:

2. The Subject Property encompasses 4.83± acres with 32± feet of frontage along U.S. Route 130 and 700± feet of frontage along Cathy Lane. There are three (3) buildings on the Subject Property. The Office Building, a one-story wood frame structure is used for administrative functions. This building has an addition at the west (rear) elevation that integrates two (2) travel trailers with a structure in between that were adjunct offices at one time but are now unused. The "Green Building" is a concrete and steel high-ceiling structure with drive in garage doors for tenants and the "Barn" is a one-story steel clad building in the shape of a small barn, used for storage. The Subject Property is used for business purposes by the current owner. The business use consists of a home base for a heating, air conditioning, plumbing and electrical contracting business. Portions of the Green Building are leased to other business owners including the Roadrunner truck inspection and service shop, the Lawn Works, a lawn service company and other businesses that store dry-goods.
3. A review of aerial photographs of the Subject Property and adjacent properties of the Subject Property from 1940, 1965, 1975, 1985, 1995 and 2002 and historical topographic maps of the Subject Property and adjacent properties from 1944, 1955 1970 and 1981 reveals that the Subject Property was developed between 1955 and 1985. Prior to 1955 the Subject Property appeared to be undeveloped land. Surrounding land usage changed from predominantly agricultural land and low-density residential development to commercial development along U.S. Highway Route 130 and high-end single family homes to the east.
4. The removal of two (2) USTs from the Subject Property was documented in a Closure Activities/ Site Investigation Report, Submitted to the NJDEP on July 19, 2006. According to the CA/SIR one (1) 2,000-gallon and one (1) 10,000 gallon UST was removed in March 2006. No evidence of leaking USTs were reported and soil samples collected and analyzed for volatile organic compounds and lead revealed no VO+10 compounds above the laboratory detection limit, and lead concentrations ranging from 2.7 to 10.0 mg/kg. None of the VO+10 compounds or lead exceeded the NJDEP Direct Contact Soil Cleanup Criteria. The July 19, 2006 submission to the NJDEP requested a No Further Action letter be issued for the UST closures. A response from the NJDEP regarding the request has not yet been issued.

5. According to the current owner, Mr. Russ Minuto and supporting documentation, two (2) gasoline USTs were removed in March 2006. The Office building on the Subject Property was serviced by an on-lot septic system; however, only domestic sewage was disposed of in the septic system. By the time the Barn and Green Building were constructed, the Florence Township sanitary sewer system had been installed and these buildings were connected to the public system. Mr. Metzger is unaware of any other known or suspected RECs or AOCs that exist on the Subject Property.
6. The Infomap Report revealed no NPL sites within 1.0 miles of the Subject Property.
7. The Infomap Report revealed no CERCLIS sites within 0.5 miles of the Subject Property.
8. The Infomap Report revealed no CERCLIS-NFRAP sites within 0.25 miles of the Subject Property.
9. The Infomap Report revealed no RCRA-TSD sites within 0.5 miles of the Subject Property.
10. The Infomap Report revealed no RCRA-COR sites within 1.0 miles of the Subject Property.
11. The Infomap Report revealed two (2) RCRA-GEN sites within 0.25 miles of the Subject Property. The RCRA-GEN sites referenced in the Infomap Report are located outside of the ASTM distance requirement.
12. The Infomap Report did not identify the Subject Property as an ERNS site.
13. The Infomap Report revealed nine (9) SHWS within 1.0 miles of the Subject Property. Eight (8) of the SHWS are located between 0.22 and 0.51 miles and are located either sidegradient or downgradient of the Subject Property. Based upon the distance and location of these SHWS from the Subject Property, it is unlikely that these sites have impacted the Subject Property. The remaining SHWS is located 0.92 miles and downgradient of the Subject Property. The site was issued a NFA by the NJDEP. Based upon the distance, location and NFA determination, it is unlikely that the site has impacted the Subject Property.
14. The Infomap Report revealed no State Landfills within 0.5 miles of the Subject Property.
15. The Infomap Report revealed ten (10) LUST sites within 0.5 miles of the Subject Property. Seven (7) of the SHWS are located between 0.17 and

0.36 miles and are located either sidegradient or downgradient of the Subject Property. Based upon the distance and location of these SHWS from the Subject Property, it is unlikely that these sites have impacted the Subject Property. Three (3) SHWS are located between 0.22 and 0.39 miles and sidegradient of the Subject Property. These sites were issued NFA determinations by the NJDEP. Based upon the distance, location and NFA determination, it is unlikely that these sites have impacted the Subject Property.

16. The Infomap Report revealed five (5) UST/AST sites within 0.25 miles of the Subject Property. Each of the five (5) UST/AST sites referenced in the Infomap Report are located outside of the ASTM distance requirement therefore, it is unlikely that these UST/AST sites have impacted the Subject Property.
17. On August 8, 2006, a written inquiry was submitted to the USEPA Region II FOIA Coordinator. On August 21, 2006, Marathon received letters from the USEPA RCRA Programs Branch, and the USEPA Resource Management/Cost Recovery Section Emergency and Remedial Response Division indicating that the USEPA was unable to find any RCRA information concerning the Subject Property and that the Subject Property was not listed on the CERCLIS or NFRAP lists at the present time. On September 7, 2006, Marathon received a letter from the USEPA Compliance Assistance and Program Support Branch indicating that a search of their databases did not reveal any air or water information pertaining to the Subject Property.
18. On August 8, 2006, a written inquiry was submitted online to the NJDEP's Office of Records Custodian in accordance with OPRA. On August 15, 2006, representative of the NJDEP's Office of Records Custodian contacted Marathon by telephone and informed Marathon that records pertaining to the Subject Property were located by the NJDEP. The representative stated that the records consisted of Tank Management Section files and UST Registration files. At that time, Marathon requested the located records be sent to Marathon. On September 12, 2006, Marathon received a full copy of the UST Closure Activities/Site Investigation report from the NJDEP, including permits, receipts and laboratory quality control data, which were summarized in Item 3 of this section. In addition, a copy of the NJDEP's response letter to the CA/SIR submission was provided. That letter required that a groundwater investigation be conducted pursuant to N.J.A.C. 7:26E-3.7 along with some administrative requirements.
19. On August 8, 2006, Marathon conducted an on-line search of the NJDEP's database of Known Contaminated Sites in New Jersey. The Subject Property was not listed in the aforementioned database. On August 8, 2006, Marathon conducted an on-line search of the NJDEP's

database of Site Remediation and Waste Management in New Jersey. The Subject Property was not listed in the aforementioned database.

20. On August 8, 2006, a written inquiry was submitted to Burlington County in accordance with OPRA. On August 28, 2006, Marathon received a letter from Ralph Shrom, Custodian of Public Records for Burlington County. Mr. Shrom indicated that the Burlington County Health Department was unable to find any document pertaining to the Subject Property.
21. On August 8, 2006, a written inquiry was submitted to the Township Clerk for Florence Township in accordance with OPRA. On September 20, 2006, Marathon received a response to this request that indicated that there are no outstanding tax assessments or pending legal action against the current owner; however, there are open permits related to the removal of certain underground storage tanks and that the township will require that the new owners obtain site plan approval from the Planning or Zoning Board prior to occupying the site. On September 21, 2006 Marathon spoke with the Florence Township Code Office regarding the open UST demolition permits. Florence Township requires copies of the UST closure and any investigation documentation to close the open permits.
22. Marathon observed a disturbed area of soil that was reported to be the location where two (2) gasoline USTs were removed. No evidence of any other USTs were observed on the Subject Property during the site reconnaissance.
23. Marathon observed six (6) ASTs on the Subject Property during the site reconnaissance. Five (5) of these ASTs were in use and were located within the tenant spaces of the Green Building and Barn and were staged on the slab on grade concrete floor. While there was some stained concrete near these ASTs, no evidence of discharge to the environment was observed. The sixth AST, located in a garage of the Green Building, was empty and not connected to any apparatus.
24. Marathon observed no evidence of suspect PCB containing equipment on the Subject Property during the site reconnaissance.
25. Marathon observed the storage of used and new motor oils and various automotive fluids in the Roadrunner tenant space and pallet quantities of plastic bagged fertilizers in the Lawn Works tenant space. These materials were located within the tenant spaces of the Green Building and were staged on the slab on grade concrete floor. No evidence of discharge to the environment was observed.
26. Solid waste generated at the Subject Property is placed into dumpsters staged on the Subject Property and disposed of with a disposal contractor.

While miscellaneous waste, including tires and wood were observed on the Subject Property, it was in the process of being removed at the time of the site reconnaissance.

27. Marathon observed no pits, ponds or lagoons on the Subject Property during the site reconnaissance.
28. Marathon observed a trench drain in the Roadrunner tenant space. This drain conveyed vehicle wash water directly to the Florence Township sanitary sewer; however, it has reportedly been plugged for many years.
29. Marathon observed no stressed vegetation, stained soils or pavement on the Subject Property during the site reconnaissance.
30. Marathon observed no evidence of a septic system on the Subject Property during the site reconnaissance.
31. Marathon observed no railroad easements on the Subject Property during the site reconnaissance.
32. Marathon observed a concrete cover adjacent to the Office building that was reported to be the on-site potable well for the Subject Property prior to the installation of the Florence Township water lined. It has reportedly been abandoned since that time.
33. None of the adjacent property uses is expected to have impacted the Subject Property.
34. We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-00. Any exceptions to or deletions from the practice are described in Section 1.0 (Introduction) of this report. This assessment has revealed no RECs and/or AOCs associated with the Subject Property with the exception of possible groundwater contamination resulting from the detected discharge of gasoline during the March 2006 UST closure activities.

Marathon recommends that the seller comply with the requirements of the NJDEP's July 31, 2006 letter and that an NFA for the USTs be obtained prior to accepting ownership of the Subject Property. Marathon recommends that JOTTAN Inc. obtain a full copy of the QuantX UST Closure Activities/Site Investigation Report and all subsequent documents or communications with the NJDEP for the Subject Property for their property files and submit the required documentation to Florence Township to close the open UST demolition permits.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Liberty Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

DEED EXHIBIT

Prepared by:

Joanna M. Perilli, Esq.

DEED

This Deed is made on the 28th day of July, 2008.

BETWEEN

CATHY LANE, LLC, a New Jersey limited liability company, with offices at 5205 Route 130, Post Office Box 166, Florence, New Jersey 08518, hereinafter referred to as the Grantor,

AND

CATHY LANE, LLC, a New Jersey limited liability company, with offices at 5205 Route 130, Post Office Box 166, Florence, New Jersey 08518, hereinafter referred to as the Grantee,

The words "Grantor" and "Grantee" shall mean all Grantors and all Grantees listed above.

TRANSFER OF RIGHTS. The Grantor grants and conveys (transfers ownership of) the property described below to the Grantee. This transfer is made for the nominal sum of One Dollar (\$1.00) and other good and valuable consideration. The Grantor acknowledges receipt of this money.

TAX MAP REFERENCE. This property is currently known and designated as Lot 3.01, Block 163.01 (formerly a portion of Lot 3.01, Block 163.01) on the Tax Maps of Florence Township, Burlington County, New Jersey.

PROPERTY. The property consists of the land and all the buildings and structures on the land in the Township of Florence, County of Burlington, State of New Jersey. The legal description of the property is:

See Schedule A annexed hereto and made a part hereof.

This conveyance is subject to zoning ordinances, and all other easements and restrictions of record, if any.

Being Parcel A of the premises conveyed to Cathy Lane, LLC, a New Jersey Limited Liability Company, by Deed of Minor Subdivision from Cathy Lane, LLC, a New Jersey Limited Liability Company, by Deed bearing even date herewith and about to be recorded herewith in the Burlington County Clerk's Office.

0806587 PG 765

PROMISE BY GRANTOR. The Grantor promises that except as set forth above, the Grantor has done no act to encumber the Property. This promise is called a "covenant as to grantor's acts" (N.J.S.A. 46:4-6). This promise means that the Grantor has not allowed anyone else to obtain any legal rights which affect the Property (such as by making a mortgage or allowing a judgment to be entered against the Grantor).

SIGNATURES. This Deed is signed by the Grantor as of the date at the top of this instrument.

Witness:

Cathy Lane, LLC

Brian M. Guest, Esquire

SELLER ASSURANCES (Check the Appropriate Box) Boxes 2 through 8 apply to NJ-residents

1. ☐ I am a resident taxpayer (individual, estate, or trust) of the State of New Jersey pursuant to N.J.S.A. 54A:1-1 et seq. and will file a resident gross income tax return and pay any applicable taxes on any gain or income from the disposition of this property.
2. ☐ The real property being sold or transferred is used exclusively as my principal residence within the meaning of section 121 of the federal Internal Revenue Code of 1954, 26 U.S.C. § 121.
3. ☐ I am a mortgagor conveying the mortgaged property to a mortgagee in foreclosure or in a transfer in lieu of foreclosure with no additional consideration.
4. ☐ Seller, transferor or transferee is an agency or authority of the United States of America, an agency or authority of the State of New Jersey, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, the Government National Mortgage Association or a private mortgage insurance company.
5. ☐ Seller is not an individual, estate or trust and as such not required to make an estimated payment pursuant to N.J.S.A. 54A:1-1 et seq.
6. ☒ The total consideration for the property is \$1,000 or less and as such, the seller is not required to make an estimated payment pursuant to N.J.S.A. 54A:1-1 et seq.
7. ☐ The gain from the sale will not be recognized for Federal income tax purposes under I.R.C. Section 721, 1031, 1033 or is a cemetery plot. (CIRCLE THE APPLICABLE SECTION). If each section does not ultimately apply to this transaction, the seller acknowledges the obligation to file a New Jersey income tax return for the year of the sale (see Instructions).
- ☐ No non-like kind property received
8. ☐ Transfer by an executor or administrator of a decedent to a devise or heir to effect distribution of the decedent's estate in accordance with the provisions of the decedent's will or the Interstate laws of this state.

**DECLARATION OF EASEMENTS, RESTRICTIVE
COVENANTS, AND MAINTENANCE AGREEMENT AS TO
ROADWAY IN FLORENCE TOWNSHIP
(Block 163.01, Lots 3.01 & 3.07)**

THIS DECLARATION is made on this 29th day of July, 2008 by and between the CATHY LANE, LLC, a limited liability company of the State of New Jersey with offices at 5205 Route 130, Post Office Box 166, Florence, New Jersey 08518 (hereinafter "Owner"), and PRM ASSOCIATES, INC., a body corporate of the State of New Jersey with offices at 2096 Route 130, Burlington, New Jersey 08016 (hereinafter "PRM" or "Grantee"). Cathy Lane, LLC/Owner and PRM/Grantee are jointly referred to herein as "Declarant."

RECITALS

1. Owner and PRM (hereafter the "Parties") are signatories to a certain Lease Purchase Agreement (hereafter the "Agreement") dated July 26, 2006 together with a certain Amendment to the Agreement dated September 22, 2006 ("Amendment") in which, among other things, Owner agreed to purchase the certain premises, set forth more specifically in Exhibit "A", from PRM pursuant to certain terms and conditions therein set forth.

2. In addition, the Parties have agreed that PRM shall obtain subdivision approvals to subdivide the portion of the property leased by PRM from Owner, from the balance of the Block 163.01, Lot 3.01 and that Owner shall re-convey to PRM a parcel (proposed Lot 3.07) together with certain rights of access, ingress, and egress. The Parties recognize that said subdivision was granted, subject to conditions, by the Florence Township Zoning Board of Adjustment, as memorialized in Resolution No. ZB-2007-36, together with an extension of time for filing, as memorialized in Resolution No. ZB-2008-19, both of which are attached hereto and made a part here of as Exhibit B.

3. In order to fully implement the Agreement and its Amendment, the Parties need to provide this Declaration of Easements, Restrictive Covenants, and Maintenance Agreement for Roadway in Florence Township (hereafter the "Easement"). The Easement Area is shown on a certain Plan prepared by Avi Luzon, L.S., last dated May 1, 2007, last revised June 18, 2008, and further identified as Drawing No. 06AL3486-SUB, attached hereto as Exhibit C, and described in a certain Legal Description attached as Exhibit D.

4. If the Easement described in the Exhibits includes a temporary construction easement, such temporary easement shall terminate upon completion of construction, restoration, and acceptance of the contractor's work by the Township of Florence or other approving agency. The permanent easement shall, nevertheless, remain in full force and effect, subject to paragraph C(3) below.

5. The purpose of this instrument is to memorialize the understandings of the parties in this regard. It becomes effective immediately upon execution.

NOW, THEREFORE, in consideration of these presents and other good and valuable consideration, receipt of which is hereby acknowledged by PRM, Owner and PRM hereby agree, grant, bargain, release, convey, transfer and deliver the following:

A. Owner grants a twenty-seven and one quarter foot (27.25') wide Perpetual and Permanent easement for access, ingress, and egress over the private extension of Cathy Lane, constructed or to be constructed by PRM, to the extent shown and described on the annexed Exhibit "C" to PRM and/or its contractors, successors, employees, business invitees and assigns to access its facilities on Block 163.01, Lot 3.07 as shown on Avila plan previously approved. PRM shall have full rights of vehicular travel over the extended private portion of Cathy Lane with one access point to the interior of the PRM property (in addition to an access point over the public dedicated portion of Cathy Lane), which shall be no more than thirty (30) feet in length and shall be located on the southeasterly portion of the end of the private Cathy Lane cul-de-sac where it meets the public right-of-way, as shown on Exhibit "C".

B. Neither Party shall have the right to park vehicles or other structures within the Easement Area in the cul-de-sac "bulb". The cul-de-sac and the southerly side of the extended private portion of Cathy Lane will be signed with "No Stopping, No Standing, No Parking" signs which shall be acquired and placed at PRM's expense. Owner shall, nevertheless, have the right to park vehicles on the northerly side of the extended Cathy Lane provided that such parked vehicles do not interfere with the ability of PRM to maintain its rights of access, ingress, and egress. In addition to the foregoing, Cathy Lane shall grant an easement to the Township of

Florence for access and "turn around" purposes within the bulb area; and PRM shall take title subject to same.

- C. 1. PRM has or will construct the extended Cathy Lane to Florence Township Municipal Road standards, including thirty foot (30') wide blacktop, paving, curb to curb, and shall restore adjacent areas substantially to pre-construction condition at its sole cost and expense. PRM has or, immediately upon execution of this Agreement, will post either (a) a Letter of Credit in a form acceptable to Owner's attorney, and the attorney for the Township of Florence, in favor of Owner and the Township of Florence, or (b) cash in an amount to ensure the prompt completion on this obligation in the amount of one hundred twenty percent (120%) of the construction and restoration cost estimate as prepared by Stout & Caldwell Engineers, LLC. The first twenty-seven and one quarter feet (27.25') of the extended Cathy Lane shall be dedicated to the Township and become a public roadway; the Letter of Credit aforementioned will also include one hundred twenty percent (120%) of the construction and restoration cost estimate for the dedicated portion of Cathy Lane as well. The balance of the extended Cathy Lane, as shown on Exhibit "C" shall, although built to Township standards, remain a private right of way. PRM shall construct said right of way simultaneously with its construction of the dedicated portion of Cathy Lane. Said roadway improvements shall commence by August 15, 2008, and shall be completed by November 30, 2008. In the event that top course cannot be installed because of Municipal requirements, then so long as base course and curbing are completed by November 30, 2008, PRM shall have until March 31, 2009 to complete top course.
- a. PRM shall post the Letter of Credit prior to commencement of construction, or prior to transfer of title to Lot 3.07, whichever first occurs. Transfer of title, however, shall occur within three (3) days following the execution of this Agreement.
- b. Follow completion of the road work referenced above for both the dedication portion of Cathy Lane, and that portion which will remain a private Right-of-Way, as well as the cul-de-sac and "bulb" area, PRM shall post a Letter of Credit to serve as a Maintenance Bond, again in favor of the Township of Florence and Owner, for the purposes for which maintenance guarantees are issued for public improvements under the Municipal Land Use Law.

2. Owner shall be responsible for the maintenance of the private portion of Calby Lane and the bulb area, such as snow removal, plowing, roadway maintenance, drainage inlet maintenance, and the like. Owner shall provide said maintenance to a standard which shall be consistent with a safe and well-maintained travel surface. PRM shall be responsible for fifty percent (50%) of the cost of such maintenance. PRM shall annually deposit the sum of Five Thousand Dollars (\$5,000.00) into an interest bearing escrow account to be maintained by Owner which shall be the base escrow amount. Semi-annually, Owner shall render an accounting of the maintenance costs to PRM and pay fifty percent (50%) of the total cost from the escrow to itself. Should fifty percent (50%) of the maintenance costs exceed Five Thousand Dollars (\$5,000.00) PRM shall pay to Owner the additional sum within forty-five (45) days of the rendering of the accounting and replenish the escrow with an amount equal fifty percent (50%) of the total maintenance expense as shown by the accounting for the previous year. Should fifty percent (50%) of the total maintenance costs be less than Five Thousand Dollars (\$5,000.00), PRM shall replenish the escrow to the base escrow amount of Five Thousand Dollars (\$5,000.00).

a. The initial Five Thousand Dollar (\$5,000.00) maintenance contribution required from PRM shall be made upon execution of this Declaration. Simultaneously therewith, Owner shall execute a Deed to PRM for the Property. Said Deed shall be held in escrow by Owner's attorneys, Parker McCay P.A. until Closing.

b. In the event that any portion of the premises being conveyed by Owner to PRM, are the subject of any mortgage secured by Owner to purchase the Property, Owner agrees to make every effort to secure a release of said premises from the mortgagee; and in any event, agrees to hold PRM harmless and indemnify it against any claims arising from said mortgage. Owner agrees to initiate efforts to secure a release of the subject premises from any mortgage upon or prior to the execution of this Declaration.

3. In the event PRM fails to make said payment(s) within thirty (30) days of demand, Owner shall send PRM a Notice of Default. In the event the Default is not cured within thirty (30) days, then PRM's right of access through and along the private right of way shall terminate, and Owner shall be permitted to file the attached "Termination of

Easement Rights", which shall be executed simultaneously herewith and held in escrow by Owner. Notwithstanding the foregoing, after the expiration of the thirty (30) day notice period, payments due and owing to Owner by PRM shall accrue interest at the rate of twelve percent (12%) per annum.

4. If either Party shall fail to perform fully and completely any duty or obligation imposed upon or assumed by it under this Declaration, including, but not limited to, the obligation to construct and improve the roadway by PRM, and the obligation to provide continuing maintenance on the roadway by Owner, then the other Party, after thirty (30) days notice, to the non-performing Party, may cure such default. The non-performing Party shall reimburse the other Party for all costs and expenses incurred by the other Party in curing such default promptly after demand for reimbursement by the Party.

- D. PRM and Owner shall require their contractors when constructing or maintaining the Easement Area to maintain adequate liability insurance and to hold the Parties and/or their successors and assigns harmless for any and all claims, actions, liens, suits or judgments arising out of any damage to property or personal injury or death, or for any other cause of action occurring during construction or maintenance within the Easement Area granted herein resulting from the contractor's negligent acts or omissions.

- (1) To the extent necessary, and not otherwise provided herein, Owner hereby grants to PRM a Temporary Construction Easement across the private Right-of-Way, as may be reasonably necessary, to construct, install, repair and remove any improvements necessary to accomplish the purposes of the Right-of-Way improvement described in Paragraph C (above), including, but not limited to, a Temporary Construction Easement for use in storing fill, machinery and/or equipment and similar construction related activities consisting of ten (10) feet on the north side of the Easement Area, solely during construction, reconstruction, inspection, maintenance and/or repair of the roadway. PRM shall keep the north side of the extended private Right-of-Way of Cathy Lane otherwise free and clear of obstructions and interferences with Owner's ability to use same.

- (2) Each Declarant covenants and agrees that it shall not obstruct or restrict access to any area within the Right-of-Way/Easement Area, appurtenances or utilities referenced in this document or in any other document to be executed by and between the Parties to implement the terms of this Declaration; nor will either Party hinder or otherwise interfere with the other Party's proper exercise of its rights

and privileges hereunder, except for the construction and repair activities permitted hereunder from time-to-time on a temporary basis.

- E. Other than as set forth herein, PRM shall not construct any structure in the Easement Area except with the specific written permission of Owner and in accordance with all applicable zoning and construction code regulations.
- F. **Covenants Run With The Land.** The easements, rights and obligations granted and created by this Declaration are intended to create mutual and reciprocal benefits, servitudes, rights, obligations and restrictions among the two (2) Lots; they shall be appurtenant to the respective Lots; they shall run with the Lots in perpetuity (unless and until modified or terminated in accordance with this Declaration); and they shall be binding upon and inure to the benefit of the Parties, their respected heirs, successors, and assigns, provided that in no event shall anyone other than a subsequent owner acquire any rights, by assignment or otherwise, in or to the easement or rights created under this Declaration, which rights may not be separately assigned or otherwise transferred.
- G. The Parties shall, with respect to their respective Lots, and their respective obligations hereunder, comply with all laws and other requirements of any governmental authorities having jurisdiction over these properties.
- H. Any and all provisions of this Declaration may be amended, terminated, rescinded, released or otherwise modified, in whole or in part, at any time, from time-to-time, only by a written document executed by Owner and PRM or their heirs, successors or assigns.
- I. No Dedication. Nothing contained in this Declaration is intended nor shall it be construed as a dedication of the Easement Areas for public use or to grant or create any rights in, to, or for the benefit of the general public or any governmental authority by either Party, except as otherwise specifically provided herein with regard to the twenty-seven and one quarter (27.25) foot dedication of Cathy Lane.
- J. If any provision of this Declaration is determined to void and unenforceable by any Court, that determination shall not affect the remaining provisions of this Declaration, which shall remain in full force and effect.
- K. Nothing in this Declaration shall be construed as a representation or warranty of Declarant that any of the easements granted herein are adequate or fit for the intended use.

L. **Governing Law.** This Agreement shall be construed, interpreted, and governed by the laws of the State of New Jersey.

(a) **Enforcement.** Should either Party be required to bring an action in Court to enforce the provisions of this document, and should said action prove successful, then and in that event, the non-prevailing Party shall be responsible to the prevailing Party for all reasonable legal fees and costs incurred in the course of said litigation.

IN WITNESS WHEREOF, Owner and PRM have caused this instrument to be executed on the day and year first above written.

Broker: The Landlord and Tenant recognize N/A as the Broker who brought about this Lease. The N/A shall pay the Broker's commission.

Liability Insurance: Minimum amounts for each person injured \$1,000,000, single limit.

Rent for the Term is: Tenant shall pay to Landlord throughout the Initial Term basic annual rent ("Basic Rent"), and together with all additional rent, the "Rent") in the amount of One-Hundred and 00/100 (\$100.00) Dollars per annum, payable in advance upon the execution of this Lease. Thereafter, Tenant shall pay to Landlord, throughout the Permanent Term, Basic Rent in the amount of One Thousand and 00/10 (\$1,000.00) Dollars per annum, payable in advance, on each anniversary of the Permanent Term Beginning Date, which Basic Rent shall be increased by three (3%) percent per annum over the Basic Rent paid for the immediately preceding year, commencing on the first anniversary of the Permanent Term Beginning Date and on each anniversary thereafter.

Use of Rental Space: Any lawful purpose or purposes

1. Possession, Use and Permits

The Landlord shall give possession of the Rental Space to the Tenant for the Initial Term and the Permanent Term (sometimes, collectively the "Term"), subject, however to, and with benefit of all rental income from, the existing cell tower lease (the "Cell Tower Lease") without warranty or representation as to same. The Tenant shall take possession of and use the Rental Space for the purpose stated above. The Tenant may not use the Rental Space for any other purpose without the written consent of the Landlord. The Tenant shall not allow the Rental Space to be used for any unlawful or hazardous purpose. The Tenant is satisfied that the Rental Space is zoned for the Use stated, or if it is not the Tenant, will be responsible for obtaining any use variance if one is required. The Tenant shall obtain any necessary certificate of occupancy

or other certificate permitting the Tenant to use the Rental Space for that Use. Landlord shall not be required to furnish any services or facilities or to make any repairs or alterations in or to the Rental Space or any improvements to be constructed thereon, through the term of this Lease. Tenant hereby assumes full and sole responsibility for the condition, operation, management, construction, repair, replacement and maintenance of the Rental Space.

Tenant shall also have the right to utilize the portion of Cathy Lane adjacent to the Rental Space for purposes of ingress and egress to and from the Rental Space during the Term. Tenant shall pay fifty (50%) percent of all costs of repairs, maintenance, real estate taxes, snow plowing and other costs incurred by Landlord from time to time pertaining to such portion of Cathy Lane during the Term, within ten (10) days of demand from time to time by Landlord.

Tenant shall, in the use and occupancy of the Rental Space and the conduct of Tenant's business or profession therein, at all times and at Tenant's expense comply with, and conform the Rental Space to the following requirements (the "Requirements"): all applicable laws, ordinances, orders, notices and regulations of the federal, state and municipal governments, or any of their departments and the regulations of the insurers of the Rental Space and building (including Title III of the Americans with Disabilities Act). Tenant shall indemnify, protect, defend and save harmless Landlord with regard to any non-compliance or alleged non-compliance by Tenant with any Requirements.

2. Condition of Rental Space

The Tenant has inspected the Rental Space and agrees that the Rental Space is in satisfactory condition. The Tenant agrees that the Rental Space shall be delivered to Tenant, accepts the Rental Space, in their "as is" condition on the date hereof, and agrees that Landlord shall have no obligation to perform any improvements to the Rental Space. Tenant shall be responsible at Tenant's sole cost and expense for all Alterations (under Article 14) necessary to the Rental Space in order to allow Tenant to lawfully use and occupy same.

3. No Assignment or Subletting

With the exception of the continuation of the existing Cell Tower Lease, The Tenant may not do any of the following without the Landlord's written consent: (a) assign this Lease, (b) sublet all or any part of the Rental Space, (c) permit any other person or business to use the Rental Space, (d) by operation of law, merger, or otherwise, assign, mortgage, pledge or encumber in any manner by reason of any act or omission on the part of Tenant, this Lease, or the term and estate hereby granted, or sublet or license the whole or any part of the Rental Space or permit the Rental Space or any part thereof to be used or occupied by others. Notwithstanding anything to the contrary contained in the Lease if Tenant is a corporation or partnership, and if at any time during the term of this Lease (as same may be extended), the person or persons who, on the date of this Lease, own or owns a majority of such corporation's voting shares or such partnership's partnership interest, as the case may be, cease or ceases to own a majority of such shares, or such partnership interest as the case may be (whether such sale occurs at one time or at intervals so that, in the aggregate such a transfer shall have occurred), same shall be deemed an assignment requiring Landlord's consent hereunder. During the Initial Term, Landlord's consent hereunder may be withheld in its sole and absolute discretion; however, Landlord agrees that

during the Permanent Term, Landlord shall not unreasonably withhold or delay its consent to any request hereunder.

4. Rent and Additional Rent

Tenant shall pay the Rent to the Landlord at the Landlord's address set forth above.

If the Tenant fails to comply with any agreement in this Lease, the Landlord may do so on behalf of the Tenant. The Landlord may charge the cost to comply, including reasonable attorney's fees, to the Tenant as "additional rent". The additional rent shall be due and payable as Rent with the next monthly Base Rent payment.

All other payments in addition to the Rent due from Tenant to Landlord hereunder shall be deemed "additional rent". Non-payment of additional rent shall give the Landlord the same rights against the Tenant as if the Tenant failed to pay the Base Rent.

5. Liability Insurance

The Tenant shall obtain, pay for, and keep in effect during the Term commercial general liability insurance on the Rental Space. The insurance company and the broker must be acceptable to the Landlord and must name Landlord and any Lender designated by Landlord as an additional insured. This coverage must be in at least the minimum amounts stated above.

All policies shall state that the insurance company cannot cancel or refuse to renew without at least 10 days written notice to the Landlord.

The Tenant shall deliver the original policy to the Landlord with proof of payment of the first year's premiums. This shall be done not less than fifteen (15) days before the Commencement Date. The Tenant shall deliver a renewal policy to the Landlord with proof of payment not less than fifteen (15) days before the expiration date of each policy.

6. Fire, Casualty and Other Insurance

Tenant shall, at Landlord's option, either (a) reimburse Landlord, from time to time, within five (5) days of request therefor, for liability insurance carried by Landlord with respect to the Rental Space; or (b) directly obtain and maintain fire, casualty and other insurance on the Rental Space in amounts and forms directed by Landlord and provide proof thereof together with policies therefor from time to time within five (5) days of demand therefor; any and all such insurance shall be carried and maintained in the name of and on behalf of Landlord, naming Landlord as the insured/loss payee.

7. Water Damage

The Landlord shall not be liable for any damage or injury to any persons or property caused by the leak or flow of water from or into any part of the building located upon the Rental Space.

8. Liability of Landlord and Tenant

The Landlord shall not be liable for injury or damage to any person or property unless it is due to the Landlord's negligence. The Tenant is liable for any loss, injury or damage to any person or property caused by the act or omission of the Tenant or the Tenant's employees or agents. The Tenant shall defend the Landlord from and reimburse the Landlord for all liability and costs (including reasonable attorneys' fees) resulting from any injury or damage due to the act or omission of the Tenant or the Tenant's employees or agents.

9. Real Estate Taxes

The Landlord shall pay the yearly Municipal Real Estate Taxes on the Rental Space, and Tenant shall reimburse Landlord for same from time to time upon demand therefor, such Real Estate Taxes to be allocated or appointed by Landlord in good faith.

10. Quiet Enjoyment

The Landlord has the right to enter into this Lease. If the Tenant complies with this Lease, the Landlord must provide the Tenant with undisturbed possession of the Rental Space.

11. Utilities and Services

The Tenant shall arrange and pay for all utilities and services required for the Rental Space, including the following:

(a) Heat	(d) Electric
(b) Hot and cold water	(e) Gas
(c) Heat and oil	(f) Sewer

The Landlord shall pay for the following utilities and services: NONE.

The Landlord is not liable for any inconvenience or harm caused by any stoppage or reduction of utilities and services beyond the control of the Landlord. This does not excuse the Tenant from paying Rent.

12. Repairs, Maintenance and Compliance

The Tenant shall, at the Tenant's expense, shall be responsible for all aspects of the maintenance and repair of the Rental Space and promptly comply with all laws, orders, rules and requirements of governmental authorities, insurance carriers, boards of fire underwriters, or similar groups.

The Landlord shall not be required to make any repairs to, of or with respect to the Rental Space whatsoever.

13. No Alterations

The Tenant may not make any changes or additions or improvements to the Rental Space without the Landlord's written consent. Any changes or additions made without the Landlord's written consent shall be removed by the Tenant on demand. During the Initial Term, Landlord's consent hereunder may be withheld in its sole and absolute discretion; however, Landlord agrees that during the Permanent Term, Landlord shall not unreasonably withhold or delay its consent to any request hereunder.

All changes or additions made with the Landlord's written consent shall become the property of the Landlord when completed and paid for by the Tenant. They shall remain as part of the Rental Space at the end of the Term. The Landlord may demand that the Tenant remove any changes or additions at the end of the Term. The Tenant shall promptly pay for all costs of any permitted changes or additions. The Tenant shall not allow any mechanic's lien or other claim to be filed against the Rental Space. If any lien or claim is filed against the Rental Space, the Tenant shall have it promptly removed.

Tenant, in performing Alterations shall comply with the following provisions: (i) Tenant shall first obtain the approval of Landlord of the specific work it proposes to perform and shall furnish Landlord with reasonably detailed plans and specifications; (ii) Tenant, at Tenant's cost and expense shall cause to be prepared architectural and engineering drawings and specifications, which are expressly subject to Landlord's written approval (and any written approval shall not make Landlord responsible in any way for the design of any installed systems and Tenant shall look solely to its architect, engineers, designers and any of its other agents for damages resulting from design errors or omissions); (iii) all Alterations shall be performed by responsible contractors and subcontractors who shall not prejudice Landlord's relationship with Landlord's contractors or subcontractors or the relationship between such contractors and their subcontractors or employees, or disturb harmonious labor relations, and who shall furnish in advance and maintain in effect workmen's compensation insurance in accordance with statutory requirements and comprehensive public liability insurance (naming Landlord and Landlord's contractors and subcontractors as additional insureds) with limits satisfactory to Landlord; (iv) all construction contracts for Alterations must include language holding the Landlord harmless from and against any and all claims arising from, under or in connection with such construction; and (v) all improvements shall comply with all applicable laws, codes or zoning ordinances (e.g. bulk zoning requirements and NJDEP set backs, etc.) as if the Rental Space were a separate tax lot without reference to the remainder of the Property not compromising the Rental Space.

Nothing in this Lease, or in any consent to the making of alterations or improvements contained shall be deemed or construed in any way as constituting authorization by Landlord for the making of any alterations or additions by Tenant within the meaning of N.J.S.A. 2A:44-68 or Section 3 of the Construction Lien Law (P.L. 1993, c. 318) or any amendment thereof, or constituting a request by Landlord, express or implied, to any contractor, subcontractor or supplier for the performance of any labor or the furnishing of any materials for the use or benefit of Landlord.

14. Signs

The Tenant shall obtain the Landlord's written consent before placing any sign on or about the Rental Space. Signs must conform with all applicable municipal ordinances and regulations. During the Initial Term, Landlord's consent hereunder may be withheld in its sole and absolute discretion; however, Landlord agrees that during the Permanent Term, Landlord shall not unreasonably withhold or delay its consent to any request hereunder.

15. Access to Rental Space

The Landlord shall have access to the Rental Space on reasonable notice to the Tenant to (a) inspect the Rental Space, and (b) show it to prospective buyers, mortgage lenders, contractors or insurers.

The Landlord may show the Rental Space to rental applicants at reasonable hours on notice to the Tenant within six (6) months before the end of the Term.

The Landlord may enter the Rental Space at any time without notice to the Tenant in case of emergency.

16. Fire and Other Casualty

The Tenant shall notify the Landlord of any fire or other casualty in the Rental Space. Landlord shall have no repair or restoration obligations, and this Lease shall continue unamended thereby.

17. Eminent Domain

Eminent domain is the right of a government to lawfully condemn and take private property for public use. Fair value must be paid for the property. The taking occurs either by court order or by deed to the condemning party. If any part of the Rental Space is taken by eminent domain, the entire payment for the taking shall belong to the Tenant. Tenant, at Tenant's expense, has the right to contest any condemnation proceeding affecting the Rental Space. Tenant, at Tenant's option, may terminate this Lease after a condemnation affecting the Rental Space.

18. Subordination to Mortgage

In a foreclosure sale all mortgages which now or in the future affect the Rental Space have priority over this Lease, provided that the mortgage lender shall have entered into a subordination, non-disturbance and attornment agreement with Tenant upon such lender's standard form.

19. Tenant's Certificate

At the request of the Landlord, the Tenant shall sign a certificate stating that (a) this Lease has not been amended and is in effect, (b) the Landlord has fully performed all of the Landlord's agreements in this Lease, (c) the Tenant has no rights to the Rental Space except as

stated in this Lease, (d) the Tenant has paid all Rent to date, and (e) the Tenant has not paid Rent for more than one month in advance. The Certificate shall also list all the property attached to the Rental Space owned by the Tenant.

20. Violation, Eviction, Re-entry and Damages

The occurrence of any of the following shall constitute a material default and breach of this Lease by Tenant: (i) a failure by Tenant to pay, within ten (10) days after written notice, any installment of Rent hereunder or any additional rent or any such other sum herein required to be paid by Tenant; and/or (ii) a failure by Tenant to observe and perform any other provisions or covenants of this Lease to be observed or performed by Tenant, where such failure continues for thirty (30) days after written notice thereof from Landlord to Tenant provided, however, that if the nature of the default is such that the same cannot reasonably be cured within such thirty (30) day period, Tenant shall not be deemed to be in default if Tenant shall within such period commence such cure and thereafter diligently prosecute the same to completion.

Upon the occurrence of any such event of default set forth above: (i) Landlord may (but shall not be required to) perform for the account of Tenant any such default of Tenant and immediately recover as additional rent any expenditure made and the amount of any obligations incurred in connection therewith, plus interest at the (the "Rate") of 1.5% per month from the date of such expenditure; (ii) Landlord may at its option accelerate all Rent and additional rent due for the balance of the term of this Lease and declare the same to be immediately due and payable as liquidated damages; (iii) Landlord shall have the re-entry rights provided as follows: The Landlord may end this Lease and re-enter the Rental Space if the Tenant violates any agreement in this Lease. After a court order of eviction and the warrant of removal, the Landlord may re-enter and take back possession of the Rental Space. The Tenant is liable for all damages caused by the Tenant's violation of any agreement in this Lease. This includes reasonable attorney's fees and costs. After eviction, the Tenant shall pay the Rent for the Term or until the Landlord re-rents the Rental Space, if sooner. If the Landlord re-rents the Rental Space for less than the Tenant's Rent, the Tenant shall pay the difference until the end of the Term. The Tenant shall not be entitled to any excess resulting from the re-renting. The Tenant shall also pay (a) all reasonable expenses incurred by the Landlord in preparing the Rental Space for the re-renting and (b) commissions paid to a broker for finding a new tenant. (iv) In addition to all remedies provided herein or by law, Tenant shall pay to Landlord reasonable attorneys fees and court costs incurred as a result of such breach; and/or (v) Landlord shall have all other rights and remedies available under the Lease, or at law or in equity.

21. Notices

All notices given under this Lease must be in writing. Each party must accept and claim the notices given by the other. Unless otherwise provided by law, they shall be given only by either (a) personal delivery with evidence of receipt, or (b) certified mail, return receipt requested. Notices shall be addressed to the Landlord at the address written at the beginning of this Lease and to the Tenant at the Rental Space.

22. No Waiver

The Landlord's failure to enforce any agreement in this Lease shall not prevent the Landlord from enforcing the agreement for any violations occurring at a later time.

23. Survival

If any agreement in this Lease is contrary to law, the rest of the Lease shall remain in effect.

24. End of Term

At the end of the Term, the Tenant shall (a) leave the Rental Space clean, (b) remove all of the Tenant's property, (c) return the Rental Space to the Landlord in the condition required by this Lease.

If the Tenant leaves any property in the Rental Space, the Landlord may (a) dispose of it and charge the Tenant for the cost of disposal, or (b) keep it as abandoned property.

25. Binding

This Lease binds the Landlord and the Tenant and all parties who lawfully succeed to their rights and places.

26. Full Agreement

The parties have read this Lease. It contains their full agreement. It may not be changed except in writing signed by the Landlord and the Tenant.

27. Environmental Compliance

Tenant shall not engage in operations at the Rental Space which involve the generation, manufacture, refining, transportation, treatment, storage, handling or disposal of "hazardous substances" or "hazardous waste" and Tenant shall not cause or permit to exist any Discharge (as such term is defined under the New Jersey Industrial Site Recovery Act, N.J.S.A. 13:1K-1 et seq. ("ISRA")) on or about the Rental Space. Tenant shall perform all obligations imposed with respect to ISRA by reason of Tenant's operations, acts or omissions, to the satisfaction of Landlord, in Landlord's sole discretion. Tenant shall indemnify, defend and save harmless Landlord from and against any and all fines, suits, proceedings, claims and/or actions of any kind and any and all losses, costs, damages and expenses (including, without limitation, attorney's fees) arising out of or in any way connected with any (a) spills, releases or discharges of hazardous material at the Rental Space which occur during the term of this Lease (including any renewal periods); (b) Tenant's failure to provide all information, make all submissions and take all actions required by any governmental authority; (c) Tenant's failure to comply with all requirements of, or Tenant's violation of, any environmental law including without limitation, ISRA] and/or (d) breach of any provision of this Article.

28. Waiver of Subrogation

Anything in this Lease to the contrary notwithstanding, Landlord and Tenant each hereby waives any and all rights of recovery, claim, action or cause of action against the other for any loss or damage that may occur to the Rental Space or any improvements thereto, or any personal property of Landlord or Tenant, arising from any cause that (a) would be insured against under the terms of any special form, all risk or property insurance required to be carried hereunder; or (b) is insured against under the terms of any special form, all risk or property insurance actually carried, regardless of whether it is required hereunder. The foregoing waiver shall apply regardless of the cause or origin of the claim, including but not limited to the negligence of a party or that party's agents, officers, employees or contractors. The foregoing waiver shall not apply if the waiver is found by a court of competent jurisdiction to result in the invalidation of insurance coverage to the insured for the claim in question.

29. Waiver of Claims

Landlord and Landlord's agents, servants and employees shall not be liable for, and Tenant hereby releases and relieves Landlord, its agents, servants, employees from, all liability in connection with any and all loss of life, personal injury, damage to or loss of property, or loss or interruption of business occurring to Tenant, its agents, servants, employees, invitees, licensees, visitors, or any other person, firm, corporation or entity, in or about or arising out of the Rental Space.

30. Brokers

Tenant represents and warrants to Landlord that Tenant has had no dealings, negotiations or consultations with respect to the Rental Space or this transaction with any broker or finder other than the Broker, if any, and that otherwise no broker or finder called the Rental Space to Tenant's attention for lease or took any part in any dealings, negotiations or consultations with respect to the Rental Space or this Lease. Tenant agrees to indemnify and hold harmless Landlord from and against all liability, cost and expense, including attorney's fees and court costs, arising out of any misrepresentation or breach of warranty by Tenant under this Article.

Landlord represents and warrants to Tenant that Landlord has had no dealings, negotiations or consultations with respect to the Rental Space or this transaction with any broker or finder other than the Broker, if any, and that otherwise no broker or finder took any part in any dealings, negotiations or consultations with respect to the Rental Space or this Lease. Landlord agrees to indemnify and hold harmless Tenant from and against all liability, cost and expense, including attorney's fees and court costs, arising out of any misrepresentation or breach of warranty by Landlord under this Article.

31. Holdover

In the event Tenant fails to vacate the Rental Space upon the expiration of the term or upon any earlier termination of this Lease, Tenant shall pay to Landlord double the Rent due and payable for the month after which this Lease expired or terminated as liquidated damages and in the event that Tenant holds over for more than thirty (30) days the Rent and additional rent for such additional periods shall be tripled or Landlord may pursue any other remedy.

32. Net, Net, Net Lease

It is the intention of Landlord and Tenant that the rental herein specified shall be net to Landlord in each lease year, that all costs, expenses, and obligations of every kind relating to the Rental Space which may arise during the term of this Lease shall be paid by Tenant, and that Landlord shall be indemnified by Tenant against any such costs, expenses, and obligations.

33. Purchase Option

Tenant shall, within thirty (30) days after the date hereof, apply for, and utilize its best efforts to obtain during the Initial Term, a simple minor subdivision (the "Minor Subdivision") of the Rental Space from the balance of the tax lot of which the Rental Space is a part, without reference to any other permits or approvals, and without any consideration or reference to any buildings or other improvements.

Tenant shall within thirty (30) days after Tenant obtains, at its sole cost and expense, final Minor Subdivision approval creating a separate legal lot comprised solely of the Rental Space, purchase the Rental Space upon the terms and conditions of this Article. Tenant shall pay all cost and expense incurred in pursuing all governmental approvals for such Minor Subdivision and shall comply, at its sole expense, with all requirements (including, without limitation, any required site improvements) imposed in connection with, or as a condition of, such Minor Subdivision approval. Landlord agrees to cooperate with Tenant in Tenant's Minor Subdivision application, including signing all necessary application and related forms.

At settlement, Landlord shall sell to Tenant, and Tenant shall purchase from Landlord, the Rental Space, for a purchase price equal to One Hundred Dollars, payable in full by certified or bank check.

Settlement shall take place at 10:00 a.m. prevailing time on the date provided above, or at such prior time as Landlord and Tenant may agree, provided Landlord is in any event given thirty (30) days prior written notice of settlement. Settlement shall take place at the offices of Archer & Greiner, P.C., One Centennial Square, Haddonfield, New Jersey or such other place as the parties may agree upon in writing.

At settlement, Landlord shall deliver a bargain and sale deed with covenants against grantors acts for the Rental Space, conveying good and marketable title, Tenant acknowledging and agreeing that Tenant shall accept, without limitation, title subject to the Cell Tower Lease and all restrictions, easements and other matters of record which exist as of the date hereof and any imposed as a condition of the subdivision approval. In the event that such title cannot be delivered by Landlord as above stated and Tenant is unwilling to accept such title as Landlord can deliver, then at Tenant's option Tenant may by notice to Landlord (given within ten (10) days after notice from Landlord that Landlord is unable to convey such title) either: (i) accept such title which Landlord is able to deliver without any claim for reduction of the purchase price; or (ii) terminate its obligations to purchase the Rental Space, in which case Tenant's obligation to purchase shall thereupon terminate absolutely, and neither party shall have any further liability to the other party hereunder (however, the then remaining balance of the Term of this Lease shall continue in full force and effect); or (iii) terminate this Lease, in which event the term hereof

shall cease and expire on the date which is sixty (60) days from and after the date of the giving of notice by Tenant as aforesaid.

At settlement, Tenant shall pay the cost of drawing the deed, all searches, title insurance, surveys and other conveyancing expenses, including the New Jersey realty transfer fee, and Landlord shall pay for the Landlord's attorney's fees.

Tenant acknowledges that Tenant is and/or will be fully familiar with the Rental Space and has had or will have had an opportunity to inspect the Rental Space, and the status of any other matters with respect thereto prior to settlement. As a result, Tenant agrees to accept the Rental Space "AS IS", with all faults, in their then current condition, subject to reasonable wear and tear at settlement. Landlord makes no representations or warranties whatsoever regarding the Rental Space, to the status of the title, or to the presence or absence of any asbestos, hazardous substances, hazardous wastes or toxic substances at the Rental Space or any adjacent property or to any other matter with respect to the Rental Space.

Signatures

The Landlord and the Tenant agree to the terms of this Lease by signing below. If a party is a corporation, this Lease is signed by its proper corporate officers.

FLORENCE TOWNSHIP ZONING BOARD OF ADJUSTMENT

RESOLUTION NO. ZB-2007-36

Application ZB#2007-10

RESOLUTION MEMORIALIZING THE GRANTING OF A USE VARIANCE FOR EXPANSION OF A NONCONFORMING USE, MINOR SUBDIVISION APPROVAL AND LOT FRONTAGE VARIANCE TO PRM ASSOCIATES FOR BLOCK 163.01, LOT 3.01, LOCATED IN A SM SPECIAL MANUFACTURING ZONING DISTRICT

Decided: August 28, 2007
Resolution Memorialized: September 25, 2007

WHEREAS, PRM Associates made application to the Florence Township Zoning Board of Adjustment for a variance for expansion of a nonconforming use, minor subdivision and bulk variances for Block 163.01, Lot 3.01; and

WHEREAS, for good cause shown, waivers from the application submission requirements were granted by the Board and the application was deemed complete on August 28, 2007; and

WHEREAS, the Board received report of its engineer, Dante Guzzi, PE, dated May 16, 2007, and the report has been reviewed and discussed as part of the public hearing upon this application; and

WHEREAS, the Board received report of its planner, Lisa Specca, of Clarke, Caton, Hintz, dated July 19, 2007, and the report has been reviewed and discussed as part of the public hearing upon this application; and

WHEREAS, the Florence Township Zoning Board of Adjustment met at a public hearing on August 28, 2007 to review the application pursuant to the applicable rules of the Planning Board and the applicable ordinances of Florence Township; and

WHEREAS, the applicant was represented by Richard F. Hamilton, Esquire, and sworn testimony was given by: Michael Avila, PE, PP; and Mark Minuto, applicant's vice president;

and

WHEREAS, in addition to the application and checklists, the following documents were submitted as part of the application:

1. Minor Subdivision Plan, prepared by Avi Luzon, PLS, dated May 1, 2007,
2. Business Lease between Cathy Lane, LLC and PRM Associates, dated December 21, 2006; and

WHEREAS, the following document was offered as evidence at the hearing. Exhibit A-1: draft "Declaration of Easements, Restrictive Covenant And Maintenance Agreement As To Roadway In Florence Township (Block 163.01, Lots 3.01 & 3.07)" prepared by John C Gillespie, Esquire; and

WHEREAS, it appears that the applicant has followed all procedures in making its application, and that the application, plans and all documents and material submitted therewith were reviewed by the Board Engineer, the Board Planner, the Board solicitor and Board members, and were found to be complete and in conformity with all applicable laws and regulations; and

WHEREAS, the Board, having considered the documents submitted and the evidence presented by and on behalf of the applicant makes the following findings of fact and conclusions of law with respect to this application:

1. The applicant is the option purchaser of the subject property, pursuant to the provisions of a business lease with the owner, Cathy Lane, LLC, said lease dated December 21, 2006.

2. A use variance was granted by the Board in 1998 to permit the cellular communications tower presently located on the subject 10.87 acre property. The applicant proposes to subdivide the property into two lots: proposed Lot 3.07, on which the cell tower is located, would be 3.63 acres in size; the remaining Lot 3.01 would be 7.23 acres in size. Because the lot on which the cell tower is located will be reduced in size, the nonconforming cell tower use will be expanded; therefore, a use variance is required.

3. A bulk variance is required for lot frontage for proposed Lot 3.07 to permit frontage of 25 feet instead of the 200 feet required by the zoning ordinance.

4. Mark Minuto testified as follows:

a. The applicant previously owned the entire parcel but recently sold it to Cathy Lane, LLC, retaining a 99 year lease for the subdivided portion of the property. The cell tower is on the property pursuant to a 1997 lease and access to the tower is by an easement that runs from the present right-of-way to the tower.

b. This application provides for 25 feet of additional right-of-way, extending Cathy Lane and allowing a portion of the subdivided property to front on a public road. This extension and the easement will be constructed to township standards and the 25 foot extension of Cathy Lane will be dedicated to the township.

5. Michael Avila, PE, PP, described the subdivision plan and testified as follows:

a. The adjacent properties are developed with buildings that provide services for the construction and industrial industry and the subject property is developed in a similar manner.

b. Cathy Lane will be extended 25 feet from its present terminus to provide access to the subject property.

c. The applicant proposes to pave the private access road to township specifications from the terminus of Cathy Lane to the cul-de-sac shown on the plan.

d. The cell tower is located in an 8,550 square foot compound and reducing the lot size will not have a negative impact on the properties adjacent to the site.

6. The Board finds and concludes that the applicant has satisfied the legal criteria required for the grant of the requested variance for expansion of the nonconforming cellular tower use and that there will be no substantial detriment to the public good and no substantial impairment to the zone plan. The Board also finds and concludes that an exceptional situation exists for the grant of the required frontage variance and that the frontage on a private access road and not on a public road will not be substantially detrimental to the public welfare and will not substantially impair the intent and purpose of the zone plan.

7. The Board finds and concludes that the requirements of the applicable Township ordinances have been met, subject to the variances granted herein, and that minor subdivision approval may be granted.

8. In granting the within approvals, the Board has relied on the sworn testimony of the applicant's representatives and experts, the representations of the applicant's attorney and the submitted documents and exhibits. Should the applicant deviate from this Resolution or the conditions contained herein or from the submitted documents, plans, drawings, representations and testimony presented at the hearing on this application, the Board may proceed to rescind this approval.

NOW, THEREFORE, BE IT RESOLVED by the Florence Township Zoning Board of Adjustment in the County of Burlington and State of New Jersey that the application of PRM Associates for a use variances, minor subdivision approval and bulk variances for Block 163.01, Lot 3.01 is hereby **GRANTED** for the reasons set forth above, subject to the following conditions:

1. The applicant shall contact the Zoning Board office to settle any outstanding review escrow accounts prior to the signing of the final plats and the issuance of building permits. The applicant must pay any and all required fees that are due or may become due to the Township within twenty-one (21) days notice thereof, including but not limited to settlement of any outstanding review escrow accounts.

2. The applicant shall provide proof of current tax payment to the Zoning Board clerk prior to the signing of the final plats.

3. The applicant shall obtain any and all approvals required by other agencies having jurisdiction over this matter and compliance with all conditions of such approvals.

4. If another governmental agency grants a waiver or variance of a regulation, affecting this approval or the conditions attached to it then this Board shall have the right to review that issue as it relates to this approval and these conditions and modify or amend the same.

5. The applicant shall post all performance bonds, maintenance bonds and inspection escrows as required by the Board Engineer and the Township Engineer.

6. Any permits, deeds, easements, vacations, dedications or other documents related to this proposed development shall be approved by the Board attorney and Board engineer and filed with the appropriate authority. Proof of recording with the county clerk shall

be filed with this Board. This condition shall include any sign easements and expansion of existing easements

7. The applicant shall comply with the requirements and recommendations set forth in the report of the Board Engineer, dated May 16, 2007, which is incorporated by reference herein.

8. The applicant shall comply with the requirements and recommendations set forth in the report of the Board Planner, dated July 19, 2007, which is incorporated by reference herein.

9. The applicant shall comply with the report of the Township Fire Official, dated May 17, 2007

Unofficial Document

10. The applicant shall execute a "Declaration of Easements, Restrictive Covenants, and Maintenance Agreement as to Roadway in Florence Township (Block 163.01, Lots 3.01 and 3.07)" with Cathy Lane, LLC, said document to be approved by the Board solicitor and Board engineer.

11. The applicant shall construct a cul-de-sac at the end of Cathy Lane and shall complete the construction of Cathy Lane, both to township standards and pursuant to any required approvals, and shall show the cul-de-sac and completed extension of Cathy Lane on the plans. There shall be a 30 foot cartway with curbs on both sides.

12. The applicant shall pave the private driveway, to township specifications, from the terminus of Cathy Lane to the cul-de-sac, and shall show same on the plans.

13. The applicant shall provide verification that there are no wetlands on the subject property.

14. The applicant shall obtain any and all approvals from the New Jersey Department of Environmental Protection.

15. The subdivision shall be filed by plat and proof of filing shall be submitted to the Board.

16. The plans for the extension of Cathy Lane shall be approved by the Board engineer.

17. The factual findings contained in this Resolution are incorporated by reference herein as a condition to the granting of this application as if set forth at length.

CANDIDA TAYLOR Secretary

FLORENCE TOWNSHIP ZONING BOARD OF ADJUSTMENT

RESOLUTION NO. ZB-2008-19

Application ZB#2008-08

**RESOLUTION MEMORIALIZING THE GRANTING OF AN EXTENSION
OF MINOR SUBDIVISION APPROVAL, TO AUGUST 1, 2008 TO
PRM ASSOCIATES FOR BLOCK 163.01, LOT 3.01, LOCATED IN A
SM SPECIAL MANUFACTURING ZONING DISTRICT**

Decided:

Resolution Memorialized:

March 26, 2008

April 1, 2008

WHEREAS, PRM Associates made application to the Florence Township Zoning Board of Adjustment for a variance for expansion of a nonconforming use, minor subdivision and bulk variances for Block 163.01, Lot 3.01, which approvals were granted on August 28, 2007 and memorialized by Resolution No. ZB-2007-36 adopted on September 25, 2007; and

WHEREAS, *N.J.S.A. 40:55D-47(d)* provides that approval of a minor subdivision shall expire 190 days from the date on which the resolution of approval is adopted unless within such period a plat or deed is filed with the county recording officer, and

WHEREAS, *N.J.S.A. 40:55D-47(f)* provides that the board may extend the 190 day period for filing if the developer proves to the reasonable satisfaction of the board that delays prevented the timely filing; and

WHEREAS, the applicant's attorney, Richard Hamilton, Esquire, represented to the Board that the existence of wetlands on the subject property restricted placement of the improvements and required a relocation of the cul-de-sac; and

WHEREAS, the Board finds that good cause exists, because of delays, to extend the 190 day period;

NOW, THEREFORE, BE IT RESOLVED by the Florence Township Zoning Board of Adjustment in the County of Burlington and State of New Jersey that the minor subdivision approval granted to PRM Associates for Block 163.01, Lot 3.01 is hereby **EXTENDED** to August 1, 2008.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/29/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ROEBLING STEEL CO. Cerclis ID:: 200439 EPA Id: NJD073732257	2ND AVENUE	NNE 1/2 - 1 (0.956 mi.)	0	12

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2021 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal registered storage tanks

NJ UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection & Energy's UST Data.

A review of the NJ UST list, as provided by EDR, and dated 05/27/2021 has revealed that there are 7 NJ UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

NJ INST CONTROL: Sites where engineering and/or institutional controls remain in place as part of a remedial action to address soil and/or groundwater contamination. These restrictions ensure protection of human health and the environment as long as they are maintained.

A review of the NJ INST CONTROL list, as provided by EDR, and dated 08/23/2021 has revealed that there is 1 NJ INST CONTROL site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to

EXECUTIVE SUMMARY

the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 03/29/2021 has revealed that there is 1 NJ ISRA site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at listing December 1982): Roebling Steel Co. produced steel on a site adjacent to the Delaware River in Florence, New Jersey. Two unlined lagoons are on the site, and there is evidence of dumping and spillage. The lagoons, estimated to be 3 feet deep, contain heavy metals. Drums may also have been buried at the site. Run-off may have contaminated the river. The water table in the area is only about 10 feet below the surface. Homes in Roebling and much of the surrounding area rely on ground water for their drinking water. Status July 1983): EPA is considering various alternatives for this site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GW CONTAM AREAS: Groundwater Contamination Areas

This data identifies those sites where groundwater contamination has been identified and, where appropriate, the NJDEP has established a Classification Exception Area (CEA). CEAs are institutional controls in geographically defined areas within which the New Jersey Ground Water Quality Standards (NJGWQS) for specific contaminants have been exceeded. When a CEA is designated for an area, the constituent standards and designated aquifer uses are suspended for the term of the CEA. This data layer contains information about areas in the state which are specified as the Currently Known Extent (CKE) of ground water pollution. CKE areas are geographically defined areas within which the local ground water resources are known to be compromised because the water quality exceeds drinking water and ground water quality standards for specific contaminants.

HIST MAJOR FACILITIES: List of Major Facilities

Major facilities means all facilities, located on one or more contiguous or adjacent properties owned or operated by the same person, having total combined storage capacity of 20,000 gallons or more for hazardous substances other than petroleum or petroleum products, or 200,000 gallons or more for hazardous substances of all kinds. This file contains detail information that is no longer available by the Department of Environmental Protection due to security concerns.

ISRA: ISRA Database

The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA.

An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Elevation:	39 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14042307 BRISTOL, PA
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BRISTOL	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Adelphia

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	9 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
2	14 inches	29 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
3	29 inches	59 inches	stratified loamy sand to sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
4	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	9 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
2	14 inches	29 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
3	29 inches	59 inches	stratified loamy sand to sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6
4	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42.34 Min: 4.23	Max: 5.5 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Shrewsbury

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C/D - Drained/undrained hydrology class of soils that can be drained and classified.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	9 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 1.41	Max: 5.5 Min: 3.6
2	24 inches	31 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 1.41	Max: 5.5 Min: 3.6
3	31 inches	59 inches	stratified loamy sand to sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 1.41	Max: 5.5 Min: 3.6
4	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 1.41	Max: 5.5 Min: 3.6
5	14 inches	24 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 1.41	Max: 5.5 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Galestown

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

The map displays the study area in New Jersey, centered around a green star indicating the study site. The area is bounded by a large black circle, with a smaller yellow circle highlighting the immediate vicinity of the study site. The map shows a network of roads, including Wilbur Henry Dr, Hornberger Ave, and County Hwy 661. Topographic features are indicated by red contour lines and blue areas representing water bodies. The distribution of 40 sampling points is marked with blue circles and letters (A through Z, plus additional points like 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40). A legend in the bottom right corner identifies the symbols used on the map.

-
- A number line representing a distance of 1 mile. The line is marked with 0, $\frac{1}{4}$, $\frac{1}{2}$, and 1 Miles. The segment between 0 and $\frac{1}{4}$ is highlighted in yellow.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New Jersey Public-Community Water-Supply Wells

Source: Department of Environmental Protection, Geological Survey

Telephone: 609-984-6587

New Jersey Ambient Ground Water Quality Network Data

Source: Department of Environmental Quality

Telephone: 609-984-6587

Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

STORET Water Quality Monitoring Stations

Source: Department of Environmental Protection

Telephone: 609-984-6831

STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database.

A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

Water Well Permit Information

Source: Department of Environmental Protection

Telephone: 609-984-6831

Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

OTHER STATE DATABASE INFORMATION

RADON

State Database: NJ Radon

Source: Department of Environmental Protection

Telephone: 609-984-5425

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

FILE COPY

Dear Ms. Esposito:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area(s) of concern specifically referenced above, except as noted below, so long as Ventures SME Inc did not withhold any information from the Department. This action is based upon information in the Department's case file and Ventures SME Inc's final certified report dated July 19, 2006. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Site Investigation pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the removal of one 10,000 gallon gasoline underground storage tank (UST) system, one 2,000 gallon gasoline UST and no other areas. The Department reserves its rights to require any person responsible for the contamination at the site to address Natural Resource Injuries.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination pursuant to N.J.S.A. 58:10B-12o, Ventures SME Inc and any other person who was liable for the cleanup and removal costs, and remains liable pursuant to the Spill Act, shall inform the Department in writing within 14 calendar days whenever its name or address changes. Any notices submitted pursuant to this paragraph shall reference the above case numbers and shall be sent to: Director, Division of Remediation Management and Response, P.O. Box 28, Trenton, N.J. 08625.

COVENANT NOT TO SUE

The Department issues this Covenant Not to Sue (Covenant) pursuant to N.J.S.A. 58:10B-13.1. That statute requires a Covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against:

- (a) the person who undertook the remediation;
- (b) subsequent owners of the subject property;
- (c) subsequent lesses of the subject property; and
- (d) subsequent operators at the subject property;

for the purposes of requiring remediation to address contamination which existed prior to the date of the July 19, 2006 final certified Site Investigation report for the real property at the area(s) of concern identified above, payment of compensation for damages to, or loss of, natural resources, for the restoration of natural resources in connection with the discharge on the property, or payment of cleanup and removal costs for such additional remediation.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that:

- (a) any person with the legal obligation to comply with any condition in this No Further Action Determination has failed to do so;

This Covenant, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant in the lines supplied below and the Department has received one copy of this document bearing original signatures of the Department and the person who undertook the remediation.

BULLETIN 95-1D
CHECKLIST FOR THE CLOSURE OF UNDERGROUND STORAGE TANKS

Owner of the Tank: VENTURES SNE INC. 10,000 GAL
Address of Site: 101 CATAY LN
Lot and Block No: B-163.01 L-3.01
Certified Contractor: WENGLER SERVICES INC.

The items on this checklist are practices currently accepted by the Department of Environmental Protection. Further explanation can be found in Appendix B of NFPA 30 and the American Petroleum Institute's Bulletin 1604 entitled "Recommended Practice for Abandonment or Removal of Used Underground Storage Tanks".

- ☐ 1. Owner/contractor reports that the tank was properly cleaned of residual material.
- ☐ 2. Owner/contractor reports that all residual material including water used in cleaning, was properly containerized for proper off-site disposal.
- ☒ 3. Inspection reveals that all affected piping was disconnected/capped/removed.
- ☒ 4. For abandonment in place, tank was observed to be filled and sealed with an appropriate inert material.

5. For removal:

- ☒ a. Owner/contractor has determined that the tank has been disposed of properly.
- ☒ b. The tank was rendered free of flammable vapors (e.g. Contractor has tested tank with proper monitoring equipment such as an explosive gas indicator (egi) explosion meter).
- ☒ c. The tank excavation observed to be free of obvious evidence of contamination (e.g. odors, stained soil, free product).
- ☒ d. Contaminated soil is properly staged on plastic and covered with plastic or equivalent.
- ☒ e. The removed tank was free of obvious corrosion holes or structural failure.

* If NO, then immediately contact the 24 hour DEP Hotline at (609) 292-7172 to report a discharge.
It is recommended that an excavation which indicates contamination remain open for investigation, where possible. It should, however, be secured for safety reasons.

Contractor will submit all necessary papers

SECTION C - FINANCIAL RESPONSIBILITY

Does this facility have a Financial Responsibility Assurance Mechanism?
Please list the appropriate financial information below:

☐ YES ☒ NO

Type _____ Carrier/Issuing Agency _____
Effective Date _____ Expiration Date _____ Policy Number _____ Amount \$ _____

SECTION D - OPERATION AND MAINTENANCE/RECORD KEEPING / COMPLIANCE

Please answer all the questions in this section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

- Does this facility have cathodic protection systems for all steel tanks and piping? ☐ YES ☒ NO
If "Yes", then:
a. The systems must be tested every three years pursuant to N.J.A.C. 7:14B-5.2(a)
b. For the sacrificial anode systems, the systems must be tested within 180 days after installation. (N.J.A.C. 7:14B-5.2(a))
c. For impressed current systems, the systems must be operational (turned on & providing continuous protection) pursuant to N.J.A.C. 7:14B-5.2(a)
d. For impressed current systems, the systems must be tested properly every 60 days (N.J.A.C. 7:14B-5.2(a))
e. If UST is internally lined, the lining must be inspected within 10 years after installation and every 5 years thereafter (N.J.A.C. 7:14B-4.2(a))
- Are the performance claims and documentation of monitoring systems maintained by the owner or operator pursuant to N.J.A.C. 7:14B-6.7? ☐ YES ☒ NO
- Are the proper monitoring, testing, sampling, repair and inventory records stored and accessible pursuant to N.J.A.C. 7:14B-3 and 6? ☐ YES ☒ NO
- Is the proper Release Response Plan kept on-site pursuant to N.J.A.C. 7:14B-5.5? ☐ YES ☒ NO
- Are the tanks checked monthly for the presence of water pursuant to N.J.A.C. 7:14B-6? ☐ YES ☒ NO
- Have all Fill Ports been permanently marked per API #637 and API #1542 pursuant to N.J.A.C. 7:14B-5.8? ☐ YES ☒ NO
- Are the tank systems monitored for releases monthly or on an alternate required frequency pursuant to N.J.A.C. 7:14B-6? ☐ YES ☒ NO
- Are the release detection monitoring systems operating in accordance with the manufacturer's requirements? (N.J.A.C. 7:14B-6) ☐ YES ☒ NO

NOTICE: *ALL DEADLINES FOR TANK SYSTEM UPGRADES (CORROSION PROTECTION, SPILL AND OVERFILL PROTECTION) AND LEAK DETECTION HAVE PASSED AS OF 12/22/98.

FEE: Please make checks payable to: "Treasurer, State of New Jersey".
Registration and Billing Schedules can be found in N.J.A.C. 7:14B-3.

PENALTY: Failure by owner or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J.S.A. 58:10A-12.

EMERGENCY: If a discharge or spill occurs, the NJDEP Hotline at (877)-927-6337 must be called **IMMEDIATELY** - 24 hours a day.

EXEMPTION: Residential heating oil underground storage tanks are exempt from all underground storage tank requirements.

CERTIFICATION

Must be signed as follows:

- For a corporation, by a person authorized by resolution of the Board of Directors to sign the document.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For persons other than indicated above, by the person with legal responsibility for the site.

"I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attached documents, and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties."

DEFINITIONS

- Section B5 O. "Emergency Spill Tank"** - Any underground storage tank used to collect an accumulation of hazardous substances as a result of a leak or spill.
- Section B6 I. "European" Suction Piping** - Suction piping which has enough slope so that the product in the pipe can drain back into the tank when the suction is released, and which has only one check valve, located directly beneath the pump in the dispensing unit. Any underground storage tank equipped with "European" Suction Piping has no monitoring detection requirements for piping.
- Section B8 I. In-Line Electronic Pressure Monitor** - (Used with pressurized piping only) A monitor which checks for loss of pressure piping when no product is dispensed. This method may be used once every 30 days or every time the dispenser turns off.
- Section B8 J. Automatic Line Leak Detectors** - (Required with pressurized piping - Must be able to detect a 3 gph leak within 1 hour of its occurrence)
1. Flow restrictors and flow shut offs which monitor pressure within piping and when a suspected leak is detected, either restricts the flow of product through the piping well below the 3 gph leak rate it detects, or completely cuts off product flow and shuts down the pump.
 2. Continuous alarm systems constantly monitor piping conditions and trigger an audible or visual alarm if a leak is suspected.
- Section B11 B. Empty** - means all hazardous substances have been removed that can be removed by direct pumping or drainage.
- Section B11 C. Sump** - any underground storage tank used to collect or contain a hazardous substance for no more than 48 hours.
- Section B12. Wellhead Protection Area** -
1. The area within a 2,000 ft. radius surrounding a public community or public non-community water system well when there is an underground storage tank containing gasoline or non-petroleum hazardous substances located within that area.
 2. The area within a 750 ft. radius surrounding a public community or public non-community water system well when there is an underground storage tank containing petroleum products other than gasoline located within that area.

TEMPORARY CLOSURE: Underground storage tank systems which are out of service shall comply with the provisions of N.J.A.C. 7:14B-9-1. The owner or operator of an underground storage tank system which is out of service for a period greater than three months shall follow the guidelines in the current American Petroleum Institute Bulletin #1604. The owner or operator of an underground storage tank system may request that the underground storage tank system remain out of service for a period of more than 12 months without having to close the tank system by complying with the provisions of N.J.A.C. 7:14B-9.1(b) by submitting a Site Investigation (SI) Report at least 30 days before expiration of the 12 month period. If a SI report was not filed for an UST that went into temporary closure to comply with the 12/7/98 upgrade deadline, the deadline for permanent closure is 12/31/99.

EARLIEST START OF CLOSURE DATE _____

CLOSURE OF AN UNDERGROUND STORAGE TANK (UST) SYSTEM FORM

Submission of this form is a requirement of N.J.A.C. 7:14B-9. This form replaces UST-013 and UST-N13. You can also use NJDEP On-Line at www.njdeponline.com for submittal of the Notice of Intent To Close An UST System. Additionally, an UST Facility Certification Questionnaire must be completed and submitted to the Department within seven days of the completion of all closure activities.

Has closure occurred prior to this submittal? ☐ YES/ ☐ NO If Yes date of closure: _____

Check appropriate box for type of submittal (only one type per submittal)

- ☒ 1. Notice of Intent To Close An UST System Complete Sections A, B, D

As per N.J.A.C. 7:14B-9, the owner or operator of an underground storage tank system is required to notify the Department and all county and municipal health departments and municipal agencies of the intent to close an underground storage tank system on this closure form at least 14 calendar days prior to the anticipated closure date. This notification requires no fee. A verification from the Department will be sent to the address listed in Section D of this closure form indicating the earliest date you may begin the closure of the UST system and will include a Facility ID# and an Activity # for the activity proposed. The Department will use these numbers to track all activities associated with the tank(s) and/or piping listed on this closure form. Therefore it is important that these numbers be used in all applicable future reports. You must include a copy of this form with the application required for a local demolition permit.

NOTE: If a closure plan approval (#2 below) has previously been issued for the UST system(s) being closed, notification will not be required unless additional UST systems are scheduled for closure.

- ☐ 2. UST Closure Plan Review / Variance Request Approval Complete all Sections A, B, C, D

The owner or operator of an UST system may choose to submit a closure plan to the Department for review and approval instead of a notification. The closure plan should be submitted at least 60 days in advance of the anticipated closure date. This approval requires a \$300 fee for review pursuant to N.J.A.C. 7:14B-3.5. All variances from the technical requirements of N.J.A.C. 7:26E must be included with the closure plan pursuant to N.J.A.C. 7:26E-1.6(d). After review the Department will issue a written response either approving or denying the plan. Closure may begin immediately after receiving written approval from the Department and the local authorities.

- ☐ 3. Out of Service UST Extension Request for more than 12 months Complete Sections A, B, D

The owner or operator can request an extension for an UST system to remain out of service for a period more than 12 months without having to close the tank system per N.J.A.C. 7:14B-9.1(c). This form along with a Site Investigation Report completed in accordance with N.J.A.C. 7:26E must be submitted at least 30 calendar days prior to the expiration of the 12-month period. A \$500 fee is required for review of the site investigation report. If a release monitoring system exists then an out of service UST extension request may be made as per N.J.A.C. 7:14B-9.1(c) 2.

NOTE: A completed UST Facility Certification Questionnaire must have been previously submitted to the Bureau of Fund Management, Compliance & Recovery, Registration and Billing Section indicating the UST

system(s) are out of service.

NOTE: Change in Service from a Regulated to a Nonregulated Substance

In accordance with N.J.A.C. 7:14B-9.4, the owner or operator of an Underground Storage Tank System in which the substance being stored is being changed to a substance not regulated by this chapter shall: (1) Prior to storing the nonregulated substance, empty and clean the tank by removing all liquid and accumulated sludge; (2) Prior to storing the nonregulated substance, conduct a site investigation of the Underground Storage Tank System in accordance with N.J.A.C. 7:26E-3; and (3) Submit a site investigation report prepared and presented in accordance with N.J.A.C. 7:26E-3.13 within 120 calendar days after the tank cleaning along with the required **\$500 review fee**. Additionally, the owner/operator must submit a Facility Certification Questionnaire indicating the change to the Bureau of Fund Management, Compliance & Recovery, Registration and Billing Section. Should a discharge of hazardous substances be identified, refer to N.J.A.C. 7:14B-9.4(b). In accordance with N.J.A.C. 7:26E-6.3(b)iii, contamination detected above an applicable remediation standard may require the removal of the tank system to facilitate remedial action.

- Please type or print legibly in ink. Call 609/633-0708 for help in completing this notification.
- The UST system must be registered. If the UST system is **not registered** this form will not be processed.

RE: Locating Facilities in the Area of Your Excavation

This is an Important Safety Message from Central Locating Services, Ltd.
We perform Underground Facility Protection for Various Utility Companies
listed below.

We are replying to your request to locate Underground Facilities
in an area where you are planning excavation work.

The following is the current status of our Facility marking in the
area Specified in your Notification or Notifications.

Ticket Number	Ticket Information
052141775	: 61 CATHY LN
	County/St: BURLINGTON, NJ
	Utility: COMCAST CABLE / CATV
	Status: Clear.
052141775	: 61 CATHY LN
	County/St: BURLINGTON, NJ
	Utility: VERIZON / Telephone
	Status: Clear.

If you have any questions or concerns about these responses or status
once you reach your Excavation Site, please contact our local dispatch
offices at: 732-398-4100

FROM: AT&T Long Distance Cable Protection Center GFI

This is to notify you about status of received tickets. This does not mean that another utility other than AT&T Long Distance is clear OR that future and/or

different activities at the same location would be clear.

If you have any questions about this message or if you believe

you have received this notification in error, and that AT&T cable is actually in the vicinity of your excavation activity, please call 1-800-252-1133.

=====

CERTIFICATION TO OBTAIN MUNICIPAL PERMIT

STATE OF NEW JERSEY
MUNICIPALITY: Florence Twp.
Permit No. _____

In the Matter of the
Application for a
Construction Permit at

61 Cathy Lane
(Work site/location)

I, Melissa Esser, of full age, hereby certify and say:
(Your name)

1. I am making this certification on behalf of Dangler Services Inc.
(the "Contractor").

(Name of Applicant on a Home Improvement Contractor Application for Initial Registration to the New Jersey Division of Consumer Affairs)

I am authorized by the Contractor to make the application for a construction permit for the work site identified above, and this certification.

2. The Contractor is identified as the principal contractor on the construction permit application and I am making this certification in support of the application.

3. The Contractor submitted a Home Improvement Contractor Application for Initial Registration (the "Application") to the New Jersey Division of Consumer Affairs on or before December 31, 2005. To the best of my knowledge, all of the questions on the Application were answered fully and truthfully. In addition, the Contractor completed and submitted the Disclosure Statement and all required documentation, and paid the \$90.00 registration fee.

4. As of the date of this Certification, the Contractor's Application for registration has not been denied by the New Jersey Division of Consumer Affairs, but no registration number has yet been received.

5. The Contractor has obtained commercial general liability insurance in the minimum amount of \$500,000 per occurrence, which policy is currently in full force and effect.

I hereby certify that the foregoing statements made by me are true. I am aware that if any of the foregoing statements are willfully false, I am subject to punishment.

SECTION C - FINANCIAL RESPONSIBILITY

Does this facility have a Financial Responsibility Assurance Mechanism?
Please list the appropriate financial information below:

☐ YES ☒ NO

Type _____ Carrier/Issuing Agency _____
Effective Date _____ Expiration Date _____ Policy Number _____ Amount _____

SECTION D - OPERATION AND MAINTENANCE/RECORD KEEPING / COMPLIANCE

Please answer all the questions in this section on a facility basis. Any one tank not in compliance requires a "NO" answer for the entire facility.

☐ YES ☒ NO

1. Does this facility have cathodic protection systems for all steel tanks and piping?

If "Yes", then:

- The systems must be tested every three years pursuant to N.J.A.C. 7:14B-5.2(a)
- For the sacrificial anode systems, the systems must be tested within 180 days after installation. (N.J.A.C. 7:14B-5.2(a))
- For impressed current systems, the systems must be operational (turned on & providing continuous protection) pursuant to N.J.A.C. 7:14B-5.2(a)
- For impressed current systems, the systems must be tested properly every 60 days (N.J.A.C. 7:14B-5.2(a))
- If UST is internally lined, the lining must be inspected within 10 years after installation and every 5 years thereafter (N.J.A.C. 7:14B-4.2(a))

☐ YES ☒ NO

2. Are the performance claims and documentation of monitoring systems maintained by the owner or operator pursuant to N.J.A.C. 7:14B-6.7?

☐ YES ☒ NO

3. Are the proper monitoring, testing, sampling, repair and inventory records stored and accessible pursuant to N.J.A.C. 7:14B-5 and 6?

☐ YES ☒ NO

4. Is the proper Release Response Plan kept on-site pursuant to N.J.A.C. 7:14B-5.3?

☐ YES ☒ NO

5. Are the tanks checked monthly for the presence of water pursuant to N.J.A.C. 7:14B-6?

☐ YES ☒ NO

6. Have all Fill Ports been permanently marked per API #1437 and API #1542 pursuant to N.J.A.C. 7:14B-5.8?

☐ YES ☒ NO

7. Are the tank systems monitored for releases monthly or on an alternate required frequency pursuant to N.J.A.C. 7:14B-6?

☐ YES ☒ NO

8. Are the release detection monitoring systems operating in accordance with the manufacturers requirements? (N.J.A.C. 7:14B-6)

☐ YES ☒ NO

NOTICE: *ALL DEADLINES FOR TANK SYSTEM UPGRADES (CORROSION PROTECTION, SPILL AND OVERFILL PROTECTION) AND LEAK DETECTION HAVE PASSED AS OF 12/22/98.

FEE: Please make checks payable to: "Treasurer, State of New Jersey".
Registration and Billing Schedule can be found in N.J.A.C. 7:14B-3.

PENALTY: Failure by owner or operator of a regulated underground storage tank to comply with any requirement of the State UST Act or regulations may result in the penalties set forth in N.J.S.A. 22:10A-12.

EMERGENCY: If a discharge or spill occurs, the NIDEP Hotline at (877)-527-6337 must be called **IMMEDIATELY** - 24 hours a day.

EXEMPTION: Residential heating oil underground storage tanks are exempt from all underground storage tank requirements.

CERTIFICATION

Must be signed as follows:

- For a corporation, by a person authorized by resolution of the Board of Directors to sign the document.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- For a municipality, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For persons other than indicated above, by the person with legal responsibility for the site.

"I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attached documents, and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties."

DEFINITIONS

- Section B5 O. "Emergency Spill Tank"** - Any underground storage tank used to collect an accumulation of hazardous substances as a result of a leak or spill.
- Section B6 I. "European" Suction Piping** - Suction piping which has enough slope so that the product in the pipe can drain back into the tank when the suction is released, and which has only one check valve, located directly beneath the pump in the dispensing unit. Any underground storage tank equipped with "European" Suction Piping has no monitoring detection requirements for piping.
- Section B8 I. In-Line Electronic Pressure Monitor** - (Used with pressurized piping only) A monitor which checks for loss of pressure piping when no product is dispensed. This method may be used once every 30 days or every time the dispenser turns off.
- Section B8 J. Automatic Line Leak Detectors** - (Required with pressurized piping - Must be able to detect a 3 gph leak within 1 hour of its occurrence)
1. Flow restrictors and flow shut offs which monitor pressure within piping and when a suspected leak is detected, either restricts the flow of product through the piping well below the 3 gph leak rate it detects, or completely cuts off product flow and shuts down the pump.
 2. Continuous alarm systems constantly monitor piping conditions and trigger an audible or visual alarm if a leak is suspected.
- Section B11 B. Empty** - means all hazardous substances have been removed that can be removed by direct pumping or drainage.
- Section B11 C. Sump** - any underground storage tank used to collect or contain a hazardous substance for no more than 48 hours.
- Section B12. Wellhead Protection Area** -
1. The area within a 2,000 ft. radius surrounding a public community or public non-community water system well when there is an underground storage tank containing gasoline or non-petroleum hazardous substances located within that area.
 2. The area within a 750 ft. radius surrounding a public community or public non-community water system well when there is an underground storage tank containing petroleum products other than gasoline located within that area.

TEMPORARY CLOSURE: Underground storage tank systems which are out of service shall comply with the provisions of N.J.A.C. 7:14B-9.1. The owner or operator of an underground storage tank system which is out of service for a period greater than three months shall follow the guidelines in the current American Petroleum Institute Bulletin #1604. The owner or operator of an underground storage tank system may request that the underground storage tank system remain out of service for a period of more than 12 months without having to close the tank system by complying with the provisions of N.J.A.C. 7:14B-9.1(b) by submitting a Site Investigation (SI) Report at least 30 days before expiration of the 12 month period. If a SI report was not filed for an UST that went into temporary closure to comply with the 12/22/98 upgrade deadline, the deadline for permanent closure is 12/31/99.

P.O. BOX 435
TRENTON, NEW JERSEY 08625-0435

FACILITY ID # _____ **FOR NJDEP USE ONLY**
ACTIVITY # _____
TMS # _____
RECEIVED DATE _____
EARLIEST START OF CLOSURE DATE _____

CLOSURE OF AN UNDERGROUND STORAGE TANK (UST) SYSTEM FORM

Submission of this form is a requirement of N.J.A.C. 7:14B-9. This form replaces UST-013 and UST-N13. You can also use NJDEP On-Line at www.njdeponline.com for submittal of the Notice of Intent To Close An UST System. Additionally, an UST Facility Certification Questionnaire must be completed and submitted to the Department within seven days of the completion of all closure activities.

Has closure occurred prior to this submittal? YES / NO If Yes date of closure: _____

Check appropriate box for type of submittal (only one type per submittal)

1. Notice of Intent To Close An UST System Complete Sections A, B, D

As per N.J.A.C. 7:14B-9, the owner or operator of an underground storage tank system is required to notify the Department and all county and municipal health departments and municipal agencies of the intent to close an underground storage tank system on this closure form at least 14 calendar days prior to the anticipated closure date. This notification requires no fee. A verification from the Department will be sent to the address listed in Section D of this closure form indicating the earliest date you may begin the closure of the UST system and will include a Facility ID# and an Activity # for the activity proposed. The Department will use these numbers to track all activities associated with the tank(s) and/or piping listed on this closure form. **Therefore it is important that these numbers be used in all applicable future reports.** You must include a copy of this form with the application required for a local demolition permit.

NOTE: If a closure plan approval (#2 below) has previously been issued for the UST system(s) being closed, notification will not be required unless additional UST systems are scheduled for closure.

2. UST Closure Plan Review / Variance Request Approval Complete all Sections A, B, C, D

The owner or operator of an UST system may choose to submit a closure plan to the Department for review and approval instead of a notification. The closure plan should be submitted at least 60 days in advance of the anticipated closure date. This approval requires a **\$300 fee** for review pursuant to N.J.A.C. 7:14B-3.5. All variances from the technical requirements of N.J.A.C. 7:26E must be included with the closure plan pursuant to N.J.A.C. 7:26E-1.6(d). After review the Department will issue a written response either approving or denying the plan. Closure may begin immediately after receiving written approval from the Department and the local authorities.

3. Out of Service UST Extension Request for more than 12 months Complete Sections A, B, D

The owner or operator can request an extension for an UST system to remain out of service for a period more than 12 months without having to close the tank system per N.J.A.C. 7:14B-9.1(c). This form along with a Site Investigation Report completed in accordance with N.J.A.C. 7:26E must be submitted at least 30 calendar days prior to the expiration of the 12-month period. A **\$500 fee** is required for review of the site investigation report. If a release monitoring system exists then an out of service UST extension request may be made as per N.J.A.C. 7:14B-9.1(c) 2.

NOTE: A completed UST Facility Certification Questionnaire must have been previously submitted to the Bureau of Fund Management, Compliance & Recovery, Registration and Billing Section indicating the UST

system(s) are out of service.

NOTE: Change in Service from a Regulated to a Nonregulated Substance

In accordance with N.J.A.C. 7:14B-9.4, the owner or operator of an Underground Storage Tank System in which the substance being stored is being changed to a substance not regulated by this chapter shall: (1) Prior to storing the nonregulated substance, empty and clean the tank by removing all liquid and accumulated sludge; (2) Prior to storing the nonregulated substance, conduct a site investigation of the Underground Storage Tank System in accordance with N.J.A.C. 7:26E-3; and (3) Submit a site investigation report prepared and presented in accordance with N.J.A.C. 7:26E-3.13 within 120 calendar days after the tank cleaning along with the required **\$500 review fee**. Additionally, the owner/operator must submit a Facility Certification Questionnaire indicating the change to the Bureau of Fund Management, Compliance & Recovery, Registration and Billing Section. Should a discharge of hazardous substances be identified, refer to N.J.A.C. 7:14B-9.4(b). In accordance with N.J.A.C. 7:26E-6.3(b)6ii, contamination detected above an applicable remediation standard may require the removal of the tank system to facilitate remedial action.

- Please type or print legibly in ink. Call 609/533-0708 for help in completing this notification.
- The UST system must be registered. If the UST system is **not registered** this form will not be processed.

RE: Locating Facilities in the Area of Your Excavation

This is an Important Safety Message from Central Locating Services, Ltd.
We perform Underground Facility Protection for Various Utility Companies
listed below.

We are replying to your request to locate Underground Facilities
in an area where you are planning excavation work.

The following is the current status of our facility marking in the
area Specified in your Notification or Notifications.

Ticket Number	Ticket Information
852141775	: 61 CATHY LN County/St: BURLINGTON, NJ Utility: COMCAST CABLE / CATV Status: Clear.
852141775	: 61 CATHY LN County/St: BURLINGTON, NJ Utility: VERIZON / Telephone Status: Clear.

If you have any questions or concerns about these responses or status
once you reach your Excavation Site, please contact our local dispatch
offices at: 732-398-4100

FROM: AT&T Long Distance Cable Protection Center GFI

This is to notify you about status of received tickets. This does not mean that another utility other than AT&T Long Distance is clear OR that future and/or

different activities at the same location would be clear.

If you have any questions about this message or if you believe you have received this notification in error, and that AT&T cable is actually in the vicinity of your excavation activity, please call 1-800-252-1133.

=====

Locate requested by RENEE DZAMKO from DENGLE SERVICES INC.

to the New Jersey One Call System

Re: Area of Concern
Unrestricted Use
No Further Action Letter and Covenant Not to Sue
Florence Industrial Center
61 Cathy Ln
Florence Twp, Burlington County
Preferred ID/UST#: 260520, Activity Number Reference: USR060001
TMS # N05-4217
Block 163.01 Lot 3.01

Dear Ms. Esposito:

Pursuant to N.J.S.A. 58:10B-13.1 and N.J.A.C. 7:26C, the New Jersey Department of Environmental Protection (Department) makes a determination that no further action is necessary for the remediation of the area(s) of concern specifically referenced above, except as noted below, so long as Ventures SME Inc did not withhold any information from the Department. This action is based upon information in the Department's case file and Ventures SME Inc's final certified report dated July 19, 2006. In issuing this No Further Action Determination and Covenant Not to Sue, the Department has relied upon the certified representations and information provided to the Department.

By issuance of this No Further Action Determination, the Department acknowledges the completion of a Site Investigation pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) for the removal of one 10,000 gallon gasoline underground storage tank (UST) system, one 2,000 gallon gasoline UST and no other areas. The Department reserves its rights to require any person responsible for the contamination at the site to address Natural Resource Injuries.

NO FURTHER ACTION CONDITIONS

As a condition of this No Further Action Determination pursuant to N.J.S.A. 58:10B-12o, Ventures SME Inc and any other person who was liable for the cleanup and removal costs, and remains liable pursuant to the Spill Act, shall inform the Department in writing within 14 calendar days whenever its name or address changes. Any notices submitted pursuant to this paragraph shall reference the above case numbers and shall be sent to: Director, Division of Remediation Management and Response, P.O. Box 28, Trenton, N.J. 08625.

COVENANT NOT TO SUE

The Department issues this Covenant Not to Sue (Covenant) pursuant to N.J.S.A. 58:10B-13.1. That statute requires a Covenant not to sue with each no further action letter. However, in accordance with N.J.S.A. 58:10B-13.1, nothing in this Covenant shall benefit any person who is liable, pursuant to the Spill Compensation and Control Act (Spill Act), N.J.S.A. 58:10-23.11, for cleanup and removal costs and the Department makes no representation by the issuance of this Covenant, either express or implied, as to the Spill Act liability of any person.

The Department covenants, except as provided in the preceding paragraph, that it will not bring any civil action against:

- (a) the person who undertook the remediation;
- (b) subsequent owners of the subject property;
- (c) subsequent lessees of the subject property; and
- (d) subsequent operators at the subject property;

for the purposes of requiring remediation to address contamination which existed prior to the date of the July 19, 2006 final certified Site Investigation report for the real property at the area(s) of concern identified above, payment of compensation for damages to, or loss of, natural resources, for the restoration of natural resources in connection with the discharge on the property, or payment of cleanup and removal costs for such additional remediation.

Pursuant to N.J.S.A. 58:10B-13.1d, this Covenant does not relieve any person from the obligation to comply in the future with laws and regulations. The Department reserves its right to take all appropriate enforcement for any failure to do so.

The Department may revoke this Covenant at any time after providing notice upon its determination that:

- (a) any person with the legal obligation to comply with any condition in this No Further Action Determination has failed to do so;

This Covenant, which the Department has executed in duplicate, shall take effect immediately once the person who undertook the remediation has signed and dated the Covenant in the lines supplied below and the Department has received one copy of this document bearing original signatures of the Department and the person who undertook the remediation.

1.0 Introduction

This report presents information regarding the closure of one (1) 10,000-gallon Gasoline Underground Storage Tank (UST) and one (1) 2,000-gallon Gasoline UST. The USTs were formerly located at Florence Industrial Center, 61 Cathy Lane, Florence, New Jersey. The site is located in Burlington County on Block 163.01, Lot 3.01.

The USTs were previously installed approximately in February 1982 and stored gasoline. The USTs supplied gasoline to company vehicles. It is unclear whether the USTs ever contained leaded gasoline. Therefore, the project was treated as if there was leaded gasoline contained in the UST at some point in time.

A site plan, showing UST and sampling locations is shown in **Appendix A**.

The NJDEP CLOSURE – Notice of Intent Identification for this site is as follows:

Facility ID #: 260520
TMS #: N05-4217
Activity #: UCL050001

2.0 Underground Storage Tank Closure Activities

Prior to performing the UST removal activities all necessary State and local permits were obtained by Dengler Services, Inc. (Dengler) (Removal Contractor), for both USTs (see **Appendix B**). It should be indicated that the removal of USTs occurred in two phases and permits were obtained accordingly.

All photographs related to the removal of the USTs can be found in **Appendix C**.

2.1 Closure Activities for 10,000 Gallon Gasoline UST

The closure activities for the **One (1)-10,000 Gallon Gasoline UST** proceeded as follows:

- On March 15, 2006, Dengler and QuantX, Inc. (QuantX) arrived at the site in order to remove and close the one (1) 10,000 gallon UST from the ground.
- Removed the overburden of concrete and soil covering the UST and exposed the top of the 10,000 gallon UST.
- The remaining liquid contents of the UST were pumped out of the UST by USA Oil Refining on March 18, 2006. A copy of the Non-Hazardous Waste Manifest can be found in **Appendix D**.
- The UST was "cleaned" and the remaining sludge from the UST was removed and placed in a 55-gallon steel drum for proper disposal. The drum containing the sludge was removed by LORCO Petroleum Services on May 16, 2006 (see **Appendix E** for receipt).
- Excavation continued, no visible soil stains or odor was observed during the removal of the 10,000 gallon UST.

- The 10,000 gallon UST was removed from the ground. The UST was elliptical in shape and measured approximately 120" in diameter and 204" in length. The UST was inspected thoroughly for holes, cracks or any deterioration. No visible holes, cracks or deterioration was observed.
- The excavation hole was approximately 18' in width by 27' in length and approximately 14' in depth.
- No groundwater was initially encountered when the UST was removed from the ground. After a period of some time, perched groundwater had entered the excavation area. There was no evidence of any sheen on the surface of the water.
- Once the 10,000 gallon UST was removed from the ground, it was properly secured on-site before removing off-site.
- A total eight (8) environmental soil samples were taken for the removed 10,000 gallon UST. Samples were taken at both sidewalls of the excavation (due to groundwater in the excavation). **Appendix A** shows the sample locations. One field blank sample was collected at the end of the sampling event. In addition, a trip blank was also analyzed.
- The excavation was backfilled with certified clean fill material (see **Appendix F** for receipt) and graded to match the existing topography.
- The UST was taken off-site to a metal scrap dealer (Trenton Iron and Metal) to be properly disposed. See **Appendix G** for copy of the disposal receipt.
- A Township of Florence inspection was scheduled for the removal of the 10,000 gallon UST (see **Appendix H** for receipt).

2.2 Closure Activities for 2,000 Gallon Gasoline UST

The closure activities for the **One (1)-2,000 Gallon Gasoline UST** proceeded as follows:

- On April 13, 2006, Dengler and QuantX, Inc. (QuantX) arrived at the site in order to remove and close the one (1) 2,000 gallon UST from the ground.
- Removed the overburden soil covering the UST and exposed the top of the 2,000 gallon gasoline UST.
- The remaining liquid contents of the UST were pumped out by Monarch Environmental Services on April 18, 2006. A total of 1979 gallons were pumped out. A copy of the Non-Hazardous Waste Manifest can be found in **Appendix D**.
- The UST was "cleaned" and the remaining sludge from the UST was removed and placed in a 55-gallon steel drum for proper disposal. The drum containing the sludge was removed by LORCO Petroleum Services on May 16, 2006 (see **Appendix E** for receipt).

- Excavation continued, possible visible soil stains or odor was observed during the removal of the 2,000 gallon UST. The staining of the soil was at the top half of the UST. All suspected soils were placed on 6 mil plastic and covered with plastic.
- The 2,000 gallon UST was removed from the ground. The UST was elliptical in shape and measured approximately 64" in diameter and 144" in length. The UST was inspected thoroughly for holes, cracks or any deterioration. No visible holes, cracks or deterioration was observed.
- The excavation hole was approximately 11' in width by 19'-6" in length and approximately 8' in depth.
- No groundwater was initially encountered when the UST was removed ~~ground~~ from the ground. After a period of some time, perched groundwater had entered the excavation area. There was no evidence of any sheen on the surface of the water.
- Once the 10,000 gallon UST was removed from the ground, it was properly secured on-site before removing off-site.
- A total six (6) environmental soil samples were taken for the removed 2,000 gallon UST. Samples were taken at both sidewalls of the excavation (due to groundwater in the excavation). **Appendix A** shows the sample locations. One field blank sample was collected at the end of the sampling event. In addition, a trip blank was also analyzed.
- The excavation was backfilled with certified clean fill material (see **Appendix F** for receipt) and graded to match the existing topography.
- The UST was taken off-site to a metal scrap dealer (Trenton Iron and Metal) to be properly disposed. See **Appendix G** for copy of the disposal receipt.
- A Township of Florence inspection was scheduled for the removal of the 10,000 gallon UST (see **Appendix H** for receipt).

3.0 Soil Disposal

During the removal of the 2,000 gallon UST, some suspected odors and staining was observed in the soil. The staining was observed at the top portion of the UST. All suspected soil was screened and placed on the side. The "contaminated" soil was placed on 6 mil plastic and covered with plastic.

QuantX had subcontracted to Casie-Pro Tank to remove the "contaminated" soil. On June 16, 2006, Casie Pro Tank hauled away from the site a total of 30.68 tons of "contaminated" soil. The certificate of recycling and other associated paperwork can be found in **Appendix I**.

4.0 Sampling Data

The following two (2) tables presents the summary of the sample results from each of the removed UST and its associated piping. The samples were analyzed according to New Jersey Technical Requirements for Site Remediation (N.J.A.C. 7.26 E) for an underground storage tank that previously contained gasoline.

All sampling event samples were sent to Severn Trent Laboratories (a New Jersey certified laboratory - # 12028). Copies of the laboratory results are included in ***Appendix J.***

5.0 Recommendations

Review of the analytical results presented in **Section 4.0**, indicates that there is no apparent contamination remaining at this site and all levels are below the most stringent Soils Cleanup Criteria. Therefore, it is recommended that:

- The USTs (TMS # N05-4217; Activity # UCL050001) be considered closed;
- The NJDEP de-list the two (2) gasoline USTs from its list for this site; and
- A No Further Action letter be issued for the site.

Laboratory Results
Job No. P003 - 61 Cathy Lane-10K

Dear Mr. Patel:

Enclosed are the results you requested for the following sample(s) received at our laboratory on March 20, 2006.

<u>Lab No.</u>	<u>Client ID</u>	<u>Analysis Required</u>
717918	S-1	PP VOA+10 Pb
717919	S-2	PP VOA+10 Pb
717920	S-3	PP VOA+10 Pb
717921	S-4	PP VOA+10 Pb
717922	S-5	PP VOA+10 Pb
717923	S-6	PP VOA+10 Pb
717924	S-7	PP VOA+10 Pb
717925	S-8	PP VOA+10 Pb
717926	Field-031806	PP VOA+10 Pb

Re:	TYPE OF APPLICATION:	LNA Application
	TRANSACTION:	Sale of Property
	ADDRESS:	61 Cathy Lane
	MUNICIPALITY:	Florence Township
	COUNTY:	Burlington
	BLOCK:	163.01
	LOT:	3.01, 3.04
	APPLICATION NO:	N20062624

Dear Ms. Wynn:

This is in response to your application received September 19, 2006 concerning the applicability of the Industrial Site Recovery Act (ISRA) to the above referenced establishment. On the basis of the sworn statements set forth in the affidavit signed by Paris R. Minuto, the Department finds that this transaction is not subject to the provisions of ISRA.

This decision is made in light of the absence of an industrial establishment as defined within the North American Industry Classification System numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Industrial Site Recovery Act to this transaction does not relieve the above referenced establishment of any responsibilities under any other environmental statutes, regulations or permits. In addition, this determination of ISRA inapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location. In addition, obtaining an ISRA Applicability Determination is not a substitute for the appropriate inquiry into a site prior to acquisition for the purposes of an innocent purchaser defense (pursuant to the NJ Spill Compensation and Control Act).

Should you have any further questions regarding this matter, please contact Jim Bono at (609) 633-1434.

Sincerely,

James J. Bono, Supervisor
Applicability Unit

**Re: PRM Associates, Inc. - Affidavit of Applicability/NonApplicability
61 Cathy Lane, Florence, Burlington County, New Jersey**

Dear Ladies/Gentlemen:

Enclosed please find Industrial Site Recovery Act Applicability/Non-Applicability Affidavit prepared on behalf of PRM Associates, Inc. which we would request be reviewed and an applicability determination be made based upon the information provided.

At this time, we have also enclosed our firm check in the amount of \$200.00 which represents the requisite fee for issuance of the determination.

Your kind attention and cooperation in providing the requested Letter of Applicability/Non-applicability at the earliest possible date will be appreciated.

Very truly yours,

STARK & STARK

Municipality Township of Florence County Burlington
State New Jersey Zip Code 08016

- D. Transaction for which the Applicability/Nonapplicability Determination is requested: (Check appropriate transaction)

* Please attach a detailed description of these transactions.

1. ☒ Sale of Property	7. ☐ Bankruptcy
2. ☐ Sale of Business	8. ☐ Corporate Merger*
3. ☐ Business Cessing Operations	9. ☐ Partnership Situation Change*
4. ☐ Refinancing/Construction Loan	10. ☐ Intra Family
5. ☐ Sale of Stock in Corporation*	11. ☐ Corporate Reorganization
6. ☐ Condemnation	12. ☐ Sale of Assets
Other: (Explain) _____	

Date of Planned Transaction: October 14, 2006

Purchaser:

Name Jottan, Inc.
Address P.O. Box 146
City or Town Florence County Burlington
State New Jersey Zip Code 08016

*PRM Associates, Inc. is the former owner of the property and is currently under contract to purchase the property. PRM Associates, Inc. has also signed a contract to sell the property to Jottan, Inc., the ultimate purchaser.

E. Operations:

- 1.) The property owner and/or operator must completely describe in detail the operations and processes conducted at the site including a list of all tenants, their operations and processes, occupying any part of the property since December 31, 1983. (Attach additional sheets, if necessary.)

To the best of undersigned's knowledge, the users listed in Schedule A used all or part of the property from 12/31/83 to present.

- 2.) If the property described above is vacant land, does the owner described in F below own contiguous property. Yes X No (If yes, please describe onsite operations.)

F. Current Owner of the Property for which an Applicability/Nonapplicability Determination is requested:

Name Ventures S.M.E., Inc.

Street Address 2035 Columbus Road

Municipality Burlington

State New Jersey Zip Code 08016

Tele No. c/o Rosemary Spahn, Esq. (856) 770-0990

G. History:

1. Previous Owners and history of on-site operations since December 31, 1983. (Attach additional sheets, if necessary.)

Name	Address	Date/Operations
PRM Associates, Inc.	61 Cathy Lane, Florence, NJ	Acquired 1975
Ventures S.M.E., Inc.	2035 Columbus Rd., Burlington, NJ	Acquired 2004

2. Is this site currently or has this site previously been the subject of any other ECRA or ISRA review? ECRA Review.

X Yes No If yes, please provide case number N74438

H. Hazardous Substances or Wastes: (This information is only required if the facility or business has a subject SIC.)

List all types and quantities of hazardous substances and hazardous wastes as defined at N.J.A.C. 7:1E-1.7 and N.J.A.C. 7:26-1.6 respectively, including but not limited to petroleum products, that are generated, manufactured, refined, transported, treated, stored, handled or disposed at the property, both above and below ground.

N/A

- I. How is the building(s) heated? (Oil, X Gas, Electric) If Oil, how many tanks?

Storage capacity of each N/A Above or below ground

- J. Was the building(s) ever heated by oil? Yes X No If so, when?

CERTIFICATION:

The following certification shall be signed by a duly authorized person pursuant to the requirements of N.J.A.C. 7:28B-1.6(e) as follows.

- For a corporation, by a principal executive officer of at least the level of vice president;
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or
- For a municipality, State, Federal or other public agency, by either a principal executive officer or ranking elected official.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate, or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of N.J.S.A. 13:1K-6 et seq., I am personally liable for the penalties set forth at N.J.S.A. 13:1K-13.

Mr. Paris Minuto
PRM Associates, Inc.
P.O. Box 62
Florence NJ 06518

RE: Florence Industrial Center
Cathy Lane & Rt. 130
Florence Township, Burlington County
PN74438

Dear Mr. Minuto:

This is in response to your letter dated 11/04/87, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the mortgage refinancing of the above referenced premises. On the basis of the sworn statements set forth in your affidavit, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of a transaction covered by the Act, specifically mortgage refinancing. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits.

In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Aug 27 06 04:30p

PRI* R NINUTO

p.3

Should you have any further questions regarding this matter, please contact
Jim Lane at (609) 633-7141.

Sincerely,

Michael L. Barro for
Michael DeSalvo, Supervisor
Bureau of NCRA Applicability and
Compliance

APPENDIX M: RESUMES

Project Scientist III**Qualifications Summary:**

- Over 20 years of experience in the environmental consulting field
- Licensed asbestos inspector in Pennsylvania
- Assisted in the completion of over 150 Phase I ESAs
- Performed over 200 underground storage tank closures
- Participated in the closure of over 30 sites under Act 2

Fields of Competence

As a seasoned environmental scientist and licensed asbestos inspector with more than twenty years of experience in the environmental consulting industry, Ms. Wagaman brings a depth of knowledge in environmental due diligence and site remediation services throughout Pennsylvania, New York, and New Jersey. From Phase I Environmental Site Assessment and Phase II Site Investigation through remediation and site closure, she excels in the performance, coordination and management of field services. Ms. Wagaman has been involved in hundreds of sites where a petroleum release, metals impacts, or PCB contamination has occurred. She has assisted numerous clients with coverage through the Pennsylvania Underground Storage Tank Indemnification Fund, the Act 2 Administrative process and other state cleanup programs, and forms related to regulatory compliance for underground storage tank systems.

Credentials

B.S., Agronomy and Environmental Science, Delaware Valley College (1997)
Pennsylvania Licensed Asbestos Inspector (2019)

Training

Asbestos Inspector Initial Training Course (2019) and annual recertification courses (2020)
PCPG Environmental Field Methods Refresher (2014)
PCPG USTIF Summer Series (2007)
ASTM Phase I & II ESA Training Course (2005)
PA DEP Land Recycling Program Workshop (2003)
OSHA HAZWOPER 40-hour Certification (2000) and annual refresher courses (2001-2020)
First Aid & CPR Certification

Summary of Projects***Pennsylvania Underground Storage Tank Closures***

Underground Storage Tank Removal, Borough of Kutztown, PA:
Supervised the removal of a 2,000 gallon tank previously used to store heating oil and collected soil samples for further analysis. Preliminary water screening found a compound to be in exceedance of state regulation, but impacts were not likely to pose a risk.

Project Scientist III

Underground Storage Tank Removal, Muhlenberg Township, Berks County, PA: Phase I ESA identified two underground storage tanks as recognized environmental conditions and recommend the removal of the unused tank and a limited soil investigation of the two areas. Excavated unused gas tank and completed soil investigation for signs of contamination at both tanks. No evidence of release was found and the recognized environmental conditions were considered of no further concern.

Pennsylvania Act 2 Closures

Phase I ESA and Underground Storage Tank Removal, Act 2 Closure, Pottstown, PA: Completed Phase I ESA in advance of a trust selling the property which contained a home and a 3 bay automobile garage and a separate small engine repair garage. Two underground storage tanks were located a removed. One tank showed evidence of release. Site characterization of soils and groundwater and remedial activities to reach attainment were executed. Prepared a remedial action completion report through the DEP Land Recycling Program and closure was achieved.

Tank Release Remediation, Statewide Health Standards Closure, Turbotville, PA: A release from an underground gasoline tank sump caused vapors to enter the building of a gas station. A vapor mitigation system was installed and was monitored for the following 18 months. Characterized the site via soil and groundwater investigation. Soil results showed the release did not affect the soil and detections in ground water reached state standards. Statewide Health Standards were attained and the site was approved closure under Act 2.

Phase II ESA and Act 2 Closure, Industrial Remediation Project, City of Reading, PA: Completion of Phase II investigation at a former brass, bronze, and aluminum casting manufacturing facility. Completed soil investigation and oversaw subsequent excavation for remediation of exceeding metal concentrations. Sampled soil and ground water to attainment levels. Liberty prepared an Act II final report and received closure and the property was able to be sold.

Remedial Support and Act 2 Closure, Fuel Spill Clean Up, Alsace Township, PA: A 150 gallon accidental spill on a road affected approximately 500 square feet of soil. Supervised the extraction of soul and collected samples. Soil samples reported target compounds below standards. Prepared final report for Act II and received closure.

Post Excavation Soil Analysis and Act 2 Closure, Bowmansville, PA: Removal of a fuel oil underground storage tank in poor condition showed evidence of release. Observed excavation of impacted soil. Completed soil and ground water sampling. Installation of wells was required for monitoring of compounds of concern. Demonstrated attainment sampling and submitted the Act II final report for Statewide Heath Standards, which was approved.

Phase I Environmental Site Assessments (ESA)

Phase I ESA, Farmstead and Feed Mill, Bethel Township, PA: Performed a Phase 1 ESA for a 40-acre farmstead prior to sale. Noted recognized environmental conditions in the Phase I report, and made recommendations to owner. Recognized environmental conditions were addressed and the sale of the property was completed.

Project Scientist III

Phase I ESA, Car Dealership, Allentown, PA: Performed a Phase I ESA of an active car dealership in Allentown, PA. Noted recognized environmental conditions observed during the walkover and the DEP file review in the Phase I report. Recognized environmental conditions were addressed and the sale of the property was completed.

Phase I ESA, 44 Residential Properties, Reading, PA: Performed a Phase I ESA of multiple vacant, and abandoned lots in a mixed use area of Reading prior to development of these properties for low-income housing. Noted recognized environmental conditions observed during the walkover and the DEP file review in the Phase I report. This project will be transformational for the neighborhood.

Phase I ESA, Apartment Complex, Staten Island, NY: Performed two Phase I ESAs of an apartment complex located in Staten Island, NYC, for a lender. No recognized environmental conditions were observed and the financing was approved.

Phase I ESA, Proposed Wawa Market, Delaware County, PA: Performed a Phase I ESA of three parcels occupied by an active Wawa Market, a vacant commercial building, and a parking lot in Woodlyn, PA. Identified a former gasoline station that had been present on the property prior to 1970 as a recognized environmental condition. Recognized environmental conditions were addressed during a Phase II site investigation.

Pre-occupation Assessment, Commercial Property, Honeybrook, PA: Performed a limited pre-occupation walkover/assessment of a portion of a commercial property. Prepared a summary of observations made of the interior and exterior areas to be occupied by the future tenant. Prepared summary letter making recommendations to the owner prior to execution of the lease.

Phase II Site Investigations (SI)

Phase II Site Investigation, Residential Housing, City of Bradford, PA: Prior Phase I ESA noted several recognized environmental conditions, mainly oil wells, at the three residential subject areas. Supervised a geophysical survey of selected areas and completed a soil and soil vapor investigation. Detectable compounds did not exceed state standards. No remedial action was recommended and a Phase II report was completed allowing project financing to move forward.

Transactional Due Diligence, Phase II Site Investigation, Kutztown, PA: Prior Phase I assessment identified recognized environmental conditions including historic use of the property, underground and aboveground storage tanks and recommended further evaluation. Supervised a geophysical survey and soil and groundwater investigation. Recommended the remediation of contaminant exceedances and further investigation to confirm an underground storage tank that was thought to have been removed is properly closed and will pose no risk of release.

Phase II Site Investigation, City of Reading, PA: During a Phase I assessment, six areas of concern were identified based on the historical use of this property located near a regional airport. Supervised geophysical surveys and soil, groundwater, and test pit investigations. Investigation mainly performed on the former Reading Police Pistol range, which included lead impacted soils. Findings of the investigation allowed development of the larger tract to proceed.

Project Scientist III***Asbestos Containing Material (ACM) Surveys***

Asbestos Containing Material Survey and Inspection, Aluminum Casting Mill, Manheim Township, PA: Performed a comprehensive ACM inspection of over 30 buildings, containing multiple levels, at an aluminum casting mill over four days with a second inspector. Survey observations identified potential ACM within the structures that warranted confirmatory sampling and analysis. These included vinyl floor tile, transite panels, mastic, plaster, stair treads, vinyl sheet flooring, sheetrock and joint compound, cove base, window caulk, insulation, concrete filler, window glaze, and mud joints. Based on the field observations, a total of 80 bulk samples were collected. Certain samples were further separated in multiple layers for separate analysis by the laboratory, which resulted in a total of 139 individual ACM sample layer analyses. Analysis confirmed the presence of ACM in 18 of the samples, which had been collected in 10 different buildings. The environmental health and safety department for the mill is keeping this documentation on file, so that the material is properly abated should any of these locations be disturbed in the future. Prior ACM surveys had been performed at the mill over its years in operation. These known areas of ACM were inspected to determine if they were still present on the property properly placarded. Notice was made to the environmental health and safety department of one area where a sign was missing and another area where a sign was not properly displayed.

Asbestos Containing Material Inspection, Commercial Building, Manheim Township, PA: As part of a property transaction, an ACM inspection of one-story 15,000-square foot industrial building that was constructed in the early 1980s. A total of 21 bulk samples were collected, some of which were further separated in multiple layers for separate analysis by the laboratory, which resulted in the analysis of a total of 38 samples. Only one sample was confirmed as ACM (defined as having an asbestos content of greater than 1.0%). The location, quantity and condition of the ACM was presented in a summary report along with a description of the survey activities and a complete listing of all sampled materials and their analytical results.

Qualifications Summary

- *Environmental professional meeting the qualifications specified in the EPA's All Appropriate Inquiry Final Rule*
- *Over 22 years of experience in environmental management consulting for land development and private industry*
- *Performed over 1,400 real estate due diligence and advisory projects for private lenders, attorneys, and industrial, commercial and residential developers*
- *Managed multi-phase environmental investigations, remedial programs, and monitoring programs for various utility/industrial/commercial clients throughout the Mid-Atlantic U.S.*

Fields of Competence

With more than twenty-two years of experience in the environmental consulting industry, Mr. Adukaitis is an expert in environmental due diligence in support of real estate transactions. In his role as Project Manager, he is the key client contact responsible for the daily management of real estate due diligence projects, from single sites to large portfolios, including Phase I environmental site assessments, Phase II site investigations, property condition assessments, and specialized evaluations for lender, attorney, and developer clients.

Credentials

B.A. Environmental Studies, Denison University (1999)

Training and Associations

OSHA 40 Hour Worker Training
Property Condition Assessment (PCA) Training
Radon Certification

Key Projects

Real Estate Due Diligence – Phase I Environmental Site Assessments

As an environmental professional (EP) meeting the qualifications specified in the EPA's All Appropriate Inquiry Final Rule, performed over 1,100 Phase I Environmental Site Assessments (ESAs), New Jersey Department of Environmental Protection (NJDEP) Preliminary Assessments, and real estate transaction screens at commercial, residential, industrial facilities, and development tracts throughout the eastern United States.

Mixed-use Facility, Capital Heights, Maryland: Performed a Phase I ESA at a grocery store. Identified recognized environmental conditions (RECs) associated with an automobile service center and underground storage tanks (USTs).

Grocery Store, Shelton, Connecticut: Performed a Phase I ESA at a grocery store. Identified RECs associated with historical manufacturing operations, including USTs.

Manufacturing Facility, Pittsburgh, Pennsylvania: Performed a Phase I ESA at a pipe bending and fabrication facility. Identified RECs

associated with manufacturing operations, including the storage and use of hydraulic oil, lubricating oil, and solvents.

Day Care Facilities Portfolio, Pennsylvania: Performed Phase I ESAs and Lead Risk Assessments at 3 day care facilities in Bucks County and Philadelphia.

Self-Storage Facility, Lewistown, PA: Performed a Phase I ESA at a self-storage facility in Mifflin County. Identified an REC associated with a former automotive service facility.

Motorcycle Sales and Service Center, Lititz, PA: Performed a Phase I ESA at a motorcycled sales and service center in Lancaster County. Identified RECs associated with a ASTs, in-ground hydraulic lifts and the former use of the property as a gasoline filling station.

Commercial Facility, Chatham, NJ: Performed a Phase I ESA at a steam and chilled water generation facility. Identified RECs associated with a former UST and historical industrial operations.

Chicken Hatchery Facilities Portfolio, Virginia: Performed Phase I ESAs at 5 chicken hatcheries, ranging in size from 5 to 82 acres. Identified recognized environmental conditions (RECs) associated with underground storage tanks (USTs) and staining around an aboveground storage tank (AST).

Former Paint Manufacturing Facility, Reading, PA: Performed a Phase I ESA at a 20-acre former paint manufacturing facility in support of redevelopment planning efforts. Identified RECs associated with the former on-site generation of solid wastes, former and existing USTs, former drum storage areas, historic spills, and buried oil-based paint cans.

Farmstead and Hospital Complex, Mt. Gretna, PA: Performed a Phase I ESA at a 190-acre hospital complex and agricultural farmstead. Identified Business Environmental Risks (BERs) associated with the storage and management of various chemicals, pesticides/herbicides, medicines, maintenance materials, fuels/oils, biomedical wastes, and potentially hazardous wastes; the management of facility-owned transformers; the management of an in-use AST, out-of-use ASTs, and an out-of-use UST; and the management of a National Pollutant Discharge Elimination System (NPDES) permit.

Apartment Buildings, New York City, NY: Performed Phase I ESAs at over 50 apartment complexes in New York City. Identified RECs associated with USTs, ASTs, former industrial operations, and operations on adjacent properties. Interface with state and local government, environmental, health, and emergency agencies.

Automotive Service Facility, Newark, NJ: Performed a Phase I ESA at an automotive service facility that dated back to the 1930s. Identified RECs associated with a former gasoline filling station, a belowground hydraulic lift, a sub-slab pit, and a former UST.

Thermal Units, Wilmington, DE: Performed a Phase I ESA at an electric generation facility. Identified RECs associated with USTs at the subject property and former gas station at an adjacent property.

Real Estate Due Diligence – Property Condition Assessments

Performed property conditions assessments at commercial and residential facilities.

Medical Office Building, Reading, PA: Performed a property condition assessment at a 4,150 square foot medical office building in Reading, PA.

Grocery Store, Shelton, CT: Performed a property condition assessment at a 59,400 square foot grocery store in Shelton, Connecticut.

Furniture Retail Store, Marlton, NJ: Performed a property condition assessment at a 16,750 square foot furniture store in Marlton, New Jersey.

Mixed-Use Commercial/Multi-Family Residential Property, New York, NY: Performed a property condition assessment at a 19,000 square foot mixed-use commercial/multi-family residential property in the Borough of Manhattan.

Mixed-Use Commercial/Multi-Family Residential Property, New York, NY: Performed a property condition assessment at an 85,600 square foot mixed-use commercial/multi-family residential property in the Borough of Queens.

Real Estate Due Diligence – Phase II Site Investigations

Managed and coordinated Phase II site investigations (SI) at commercial, residential, and industrial facilities. Performed all aspects of site investigation including project planning, proposal preparation, management and technical oversight of subcontractors, field investigations, and report development. Managed field tasks, including geophysical surveys, borehole drilling, monitoring well installation, soil-vapor sampling, and sampling soil borings with surface and subsurface soil sampling.

Mixed-use Facility, Capital Heights, Maryland: Performed a Phase II SI at a mixed-use facility, which operated an automobile service center and contained six USTs. The investigation included a geophysical survey, a soil boring investigation, and a groundwater investigation.

Building Materials Supply Facility, Kutztown, PA: Performed a Phase II SI at a building materials supply facility, which formerly operated as a lumber yard, manufacturing facility, and a concrete ready mix plant. The investigation included a geophysical survey, a soil boring investigation, a groundwater investigation, and UST removal.

Metal Wire Weaving Facility, York, PA: Performed a Phase II SI at a metal wire weaving facility, which had been in operations for over 100 years. The investigation included a geophysical survey, a soil boring investigation, a groundwater investigation, and indoor air sampling.

Gasoline Filling Station, Schnecksville, PA: Performed a Phase II SI at a gasoline filling station. The investigation included a geophysical survey, a soil boring investigation and sampling the on-site water supply well.

Former Crane and Lift Manufacturing Facility, York, PA: Performed a Phase II SI at a former crane and lift manufacturing facility, which dated back to the 1960s. The investigation included a geophysical survey, a soil boring investigation, and a groundwater investigation.

Former Automobile Repair Facility, Brooklyn, NY: Performed a Phase II SI at a former automobile repair facility. The investigation included a geophysical survey, a soil boring investigation, a soil vapor investigation, and a groundwater investigation. The Phase II SI was performed in accordance with a work plan approved by the New York City Department of Environmental Protection (NYCDEP). Sampling procedures were performed in accordance with the NYSDEC *Technical Guidance for Site Investigation and Remediation* (DER-10).

Former Textile Printing Facility, Lebanon, PA: Performed a Phase II SI at a former textile printing facility. The investigation included a geophysical survey and a soil boring investigation.

State Cleanup Programs-Investigation and Remediation Services

Managed and coordinated site investigations and remediations at commercial and industrial facilities. Performed all aspects including project planning, proposal preparation, management and technical oversight of subcontractors, field investigations, and report development.

Former Auto-Mechanical Repair Facility, Hanover, PA: Served as project manager for obtaining relief from liability for soil under Pennsylvania Act 2 Site-Specific Standards and for groundwater under Pennsylvania Act 2 Statewide Health Standards at a former auto-mechanical repair facility. Project responsibilities included preparing project proposals and cost estimates; providing management and technical oversight of subcontractors, field investigations, and report preparation. Work was performed in accordance with the DEP Storage Tank Corrective Action process.

Two Thermal Control Centers ISRA Remediation, Atlantic City, NJ: Served as project manager for the Preliminary Assessment (PA), Site Investigation (SI), Remedial Investigation (RI), and Remedial Action Outcome (RAO) of a natural gas- and oil-fired steam and chilled water generating station, and a natural gas-fired steam and chilled water generating station. Project responsibilities included preparing project workplans and cost estimates; providing management and technical oversight of subcontractors, field investigations, and report preparation. Work was performed in accordance with New Jersey Industrial Site Recovery Act (ISRA) under the guidance of a Licensed Site remediation Professional (LSRP).

Deepwater Generating Station ISRA Remediation, Pennsville, NJ: Served as staff scientist, project scientist, senior project scientist, and task manager for the remediation of a coal-, natural gas-, and oil-fired electric generating station. Project responsibilities included preparing project workplans and cost estimates; providing management and technical oversight of subcontractors, field investigations, and report preparation. Managed field tasks, including borehole drilling, monitoring well installation, hydrogeologic studies, sampling soil borings with surface and subsurface soil sampling, and soil excavation. Work was performed in accordance with New Jersey ISRA.

Former Manufactured Gas Plant, Ashland, PA: Served as senior project scientist and task manager for the investigation and remediation of a former manufactured gas plant. Project responsibilities included soil investigations to determine extent of contamination, soil and ground water waste characterization sampling, and hydrogeologic studies. Prepared pre-design evaluation report and remedial action workplan documents. Oversaw remedial activities including the excavation and removal of over 14,500 tons of impacted soil and masonry material and the demolition of two

belowgrade gas holders. Oversaw the construction and operation of an on-site water treatment system which pumped and treated over 298,000 gallons of water.

Sunoco Chemicals LNAPL Recovery System, Philadelphia, PA: Served as staff scientist, project scientist, and senior project scientist for the operation and maintenance of a free product recovery system. Project responsibilities included periodic inspections, trouble-shooting and maintenance, and site-wide ground water level measurements. Developed power point training manual for plant personnel.

Pepco Holdings, Inc (PHI) Substations Investigation and Remediation, Various Sites in New Jersey, Delaware, Maryland, and Virginia: Served as staff scientist for spill investigation and waste characterization. Project responsibilities included soil investigations to determine potentially contaminated areas surrounding several types of electrical equipment including transformers, potential transformers, oil-filled and gas-filled breakers, regulators, capacitor banks, and communications towers. Conducted delineation and site investigations to determine extent of contamination. The work was performed following the requirements of the USEPA, Toxic Substance Control Act, Delaware Department of Natural Resources and Environmental Control, Maryland Department of the Environment, Virginia Department of Environmental Quality, and the New Jersey Department of Environmental Protection.

Abington Shopping Center Dry Cleaner, Abington, PA: Served as a staff scientist for obtaining relief from liability for soil and ground water under Pennsylvania Act 2 Site Specific Standards at a dry cleaning facility. Project responsibilities included quarterly ground water sampling and completing Act 2 final report.

PSEG Electrical Equipment Spill Management, Various Sites in New Jersey: Served as a staff scientist for emergency response to electrical equipment spills. The spills occurred at electric generating stations, electric switching yards, electric substations, distribution poles, and customer locations. The equipment involved included various sized transformers and capacitors, formerly containing petroleum liquids with and without PCBs. Project responsibilities included responding to spill site to observe spill contractor remedial actions and collect surface and sub-surface soil samples from open excavations. Submitted reports summarizing spill cause, equipment involved, contractor's actions, and the results of compliance sampling.
